Guidelines for **First Year Nursing** students regarding registering for lectures, laboratory, tutorial groups and clinical for **SEMESTER ONE 2011:**

Toowoomba Campus Students (s-1 – see separate document for s-2)

How to enrol	Enrolling in courses includes choosing your timetable. Follow the enrolment guide (http://www.usq.edu.au/enrol) to enrol
Enrolment pattern – standard students – 1st semester	Standard students will undertake five courses (including two 'half credit points') as stated in the handbook: http://www.usq.edu.au/handbook/2010/sci/BNUR.html Please note that the timetable has been designed for students to potentially arrange their on-campus requirements for minimal days on campus. Students are to choose their own compatible timetable. To facilitate that more students are able to build a schedule over only 2-3 contact days – the tutorial/lab offerings for the NUR and NSC courses will open first for the MON-WEDS options. At a much later date, (when these fill) – THURS/FRI will be opened. The system ***will* allow you to 'double book' yourself**. It is the student's responsibility to ensure that their individual timetable does not have schedule clashes.
Non-standard students with different Enrolment patterns	If you are taking courses from second year or third year (due to part-time progression or midyear entry) – please look at the instructions for second year students and build yourself a compatible time schedule across the offerings you are undertaking.
University timetable	Consult the Semester Semester timetable http://www.usq.edu.au/currentstudents/timetables for all your courses. NOTE: Timetables are subject to change until they are confirmed.
Conflicts	If your first choice is not available – it may open up as other students change their choices or as more labs/tutes are opened – please check again. If you have difficulties – AFTER all choices have been explored electronically - please contact the student relationship officer: usqsupport@usq.edu.au
