RATIONALE

Early childhood education is made up of a complex and diverse array of programs and services. Recently, economic, political and sociological changes stemming from equal opportunity and women's issues have resulted in early education, particularly the provision of day care, being an important community concern. Updated regulations to guide early childhood standards, and in turn the quality of education and care received by the children, have been established as a result of these social changes. Early childhood educators must be competent in the skills required in child-care centres and be able to understand the nature of political and social change affecting the provision of services.

SYNOPSIS

This course provides an introduction to the many early childhood services available to children birth-8 years, with a specific focus on child care. It will provide a brief overview of the history of early education in Australia, and review the more recent developments in the child-care field. The major focus will be in the development of programs and environments for young children with an emphasis on children birth to 3 years.

OBJECTIVES

On successful completion of this unit students will be able to:

- be equipped to identify and discuss the early childhood services
- be familiar with the history of early childhood services in Australia
- be aware of the socio-economic and political parameters of day care
- be familiar with a variety of different ways to organise and develop learning environments for young children

- be equipped to create interesting and developmentally sound and socially responsive environments for young children
- develop programs for young children which are developmentally sound and socially interactive
- use appropriate interpersonal and teaching skills for nursery and toddler groups
