RATIONALE

Language is part of literacy, which incorporates listening, speaking, reading, writing and viewing, all embedded in the social context. Because young children may spend a great deal of their early years in Early Childhood Centres, the nurturing and enhancement of emergent literacy become the responsibility of early educators. It is important to take account of those experiences children encounter through their mother tongue; their culture; their play; their early experiences in speech and stories, as well as in songs and books, from which they construct knowledge contributing to their ability to emerge as readers and writers.

SYNOPSIS

This course revolves around five principles which research suggests enhance the emergent literacy of children. These are that: emergent literacy is embedded in a social context; play is an ideal setting which allows young children to practise, elaborate and extend emergent literacy; children require frequent experiences in listening and sharing stories to demonstrate the facilitating power of language; children require frequent story book readings both as active listeners and independent readers; the modification of play environments can have an important impact on the literacy behaviour of children. These principles will be explored to illustrate the way in which effective strategies can be developed by early educators to enhance the emerging literacy of young children.

OBJECTIVES

On successful completion of this course students will be able to:

- demonstrate their ability to design and implement emergent literacy programs
- show an understanding of importance of the cultural context of emerging literacy

- reflect on and analyse the way literacy develops through play
- select and reflect on the qualities of stories and their role in enhancing emerging literacy
- consolidate and create ideas for creating an environments that enhance emerging literacy

OTHER REQUIREMENTS

- 1 When there is more than one marker for a single item of assessment, the distribution patterns and means for the different markers will be compared and marks adjusted if necessary.
- 2 Marking criteria are provided in course material as mark sheets/guides or as part of assignment specifications.
- 3 Summative assessment items will be given a numerical score.
- 4 Course Grades will be calculated by aggregating the weighted result or numerical score for each summative assessment item.
- 5 All assessment items must be submitted and passed overall.
- 6 If assignments are submitted after the due date without an approved extension of time, University penalties will apply.
