SYNOPSIS

The basic assumption of this course is that a thorough appreciation of contemporary South-east Asian Societies depends upon a knowledge of their historical evolution. In order to develop an empathetic understanding of the complex issues which confront the region today, it is necessary to recognise the persistence of tradition into the present, and the way in which contemporary behaviour may reflect long-established patterns of living and beliefs. The great interplay of peoples and cultures which permeates the historical experience of South-east Asia must be of fundamental interest and significance to an increasingly multi-cultural Australia. In essence, this course focuses upon the modern history of selected South-east Asian countries in the period from 1800 to the present day.

OBJECTIVES

On successful completion of the course, students will have:

- an informed and critical awareness of major historical developments in the South-east Asian region;
- the ability to recognise the cultural validity, diversity and richness of the South-east Asian past;
- direct acquaintance with the major classical belief and value- systems of the region, and their influence on human behaviour over time;
- further awareness of the nature of historical methodology and explanation;
- the capacity to locate and interpret original sources in translation;

- studied in depth the recent historical experience of at least ONE distinct society in the region.
