SYNOPSIS

This course provides the opportunity for the student to further investigate and develop the conceptual and theoretical processes which explore and extend visual art practice. An agreed programme of work will be developed with relevant lecturers and supervisors that will demonstrate the integration of theory and practice. This course will present students with further opportunities for specialised, in-depth practice and related research projects in their chosen area(s).

TOPICS

Description	Weighting (%)
1. This is the second course of studio project specialisation designed to further develop skills and concepts. Individual problem solving and a less 'thematic' content is emphasised. A written contractual proposal of individual student work goals and schedule is developed in consultation with discipline/inter- discipline heads and supervisors. For continuing BVA students monthly critiques with staff involved in the contract will occur. Where relevant, studio drawing, journals, self evaluation, analysis and verbal clarification of concepts and art making/production will be emphasised.	100.00
