SYNOPSIS

As the primary concern of research is directed toward the critique and innovation of theory and/or practice, students engaged in the study of visual arts should be empowered and prepared for professional practice with relevant skills and experience for continued inquiry in the field. This course provides students with the opportunity to pursue an in-depth study of a topic which is relevant to their professional and/or personal development. The project will be conducted under the guidance of appropriate staff within the relevant fields, and will develop concurrent with and related to the course Visual Research Methods, and may be studio and/or theory based. Appropriate outcomes will be realised through exhibition and supporting visual and written documentation, as a research report.

OBJECTIVES

On successful completion of this course students will be able to:

- conduct a valid study of a problem through the application of appropriate investigative procedures;

- demonstrate an ability to undertake a systematic investigation to find answers to a problem in the visual arts;
- acquire a basic practical understanding of research processes pertinent to the visual arts;
- document and critically evaluate a research study in the visual arts in a logical and sensible manner;
- demonstrate the ability to appropriately link practice to theory for the enhancement of their professional practice.
