RATIONALE

Increasing demands for quality systems and accountability make it essential that all persons involved in education and training be knowledgeable about, and competent in the effective application of evaluative approaches, processes and techniques in instructional settings. This course will address such learning outcomes.

This course firstly explores evaluation as an ongoing process essential to the continuous improvement of instruction and assessment activities. Learners will be required to demonstrate mastery of knowledge of a range of evaluative approaches, procedures and techniques appropriate to instructional settings. Learners will be required to demonstrate competency in the design, implementation and reporting of the evaluation of an instructional program within their particular context. This will require learners to utilize a range of data gathering and analysis techniques. This course will also explore issues of ethics, validity and reliability as they pertain to such evaluation activities. **IMPORTANT NOTE: Working with Children: State law in Queensland requires that all adults (including university students, pre-service educators, trainers, vocational teachers, industry educators) working with children under the age of 18, in the State of Queensland*, obtain approval before commencing such work. Many education courses include a practical component (professional experience, project work, research, assessment etc.) that may require engagement with children under the age of 18. It is your responsibility to ensure that you possess a current suitability card (Blue Card) before commencing any practical components of this course. DO NOT PARTICIPATE IN ANY PRACTICAL EXPERIENCE WITH CHILDREN UNDER 18 UNLESS YOU POSSESS A CURRENT 'BLUE CARD'. For further information:**

This would require students to pass all items of summative assessment. Final grades for this course will be calculated by aggregating the weighted grade for each graded summative assessment item.
