SYNOPSIS

This course uses self-paced computer managed instruction methods and group problem solving techniques to encourage students to develop an understanding of mathematical concepts that provide a foundation for the mathematics encountered in tertiary programs in science, engineering, surveying and business. Topics included are: basic algebra, functions and graphing, exponential, logarithmic and trigonometric functions, introductory matrix algebra, and introductory calculus. The self-paced structure and the flexibility of three alternative entry points into the course allow students to work at their own level thereby developing confidence in mathematics and general problem solving.

OBJECTIVES

On successful completion of this course the student will be able to:

1. demonstrate a sound understanding of a number of mathematical topics that are essential for tertiary studies in science, engineering, surveying and business;
2. interpret and solve a range of authentic problems involving mathematical concepts relevant to this course;
3. effectively communicate the mathematical concepts and arguments contained in this course.

IMPORTANT ASSESSMENT INFORMATION

- 1 Attendance requirements:
It is the students' responsibility to attend and participate appropriately in all activities (such as lectures, tutorials, laboratories and practical work) scheduled for them, and to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.
- 2 Requirements for students to complete each assessment item satisfactorily:
To complete each of the assignments satisfactorily, students must obtain at least a grade of C- for each assignment. To complete the examination satisfactorily, students must obtain at least a grade of C- for the examination. To complete each of the quizzes satisfactorily, students must gain at least 50% of the marks available for the quiz. Students may attempt a quiz for a module as many times as they wish up to the number of quizzes available. The final mark for a quiz will be the maximum mark of all attempts made by the student. To complete the workshop satisfactorily, students must gain at least a grade of C- for the workshops.
- 3 Penalties for late submission of required work:
If students submit assignments after the due date without prior approval then a penalty of 1 Equivalence Points gained by the student for the assignment may apply for each working day late.
- 4 Requirements for student to be awarded a passing grade in the course:
To be assured of a passing grade, students must demonstrate, via the summative assessment items, that they have achieved the required minimum standards in relation to the objectives of the course by satisfactorily completing all summative assessment items.
- 5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the aggregate of the weighted grades obtained for each of the summative assessment items in the course. The marks for Q9 to Q14 will be converted to grades for this process.
- 6 Examination information:

In an Open Examination, candidates may have access to any material during the examination except the following: electronic communication devices, bulky materials, devices requiring mains power and material likely to disturb other students

- 7 Examination period when Deferred/Supplementary examinations will be held:
Any Deferred or Supplementary examinations for this course will be held during the next examination period.
- 8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL <http://www.usq.edu.au/corporateservices/calendar/part5.htm> or in the current USQ Handbook.

ASSESSMENT NOTES

- 9 Students must complete the Preliminary Test before being permitted to participate in the rest of the course. The results of the Preliminary Test will determine at which point students will enter the course. There are three entry points (Entry Point 1, 2 and 3). Entry Point 1 students are required to complete Quizzes 1 to 14. Entry Point 2 students are required to complete Quizzes 4 to 14. Entry Point 3 students are required to complete Quizzes 9 to 14.
- 10 The workload in the Student Workload Requirements is for Entry Point 3 students. It is anticipated that the workload for Entry Point 1 and Entry Point 2 students will be substantially more .
- 11 Students will require access to e-mail and web access to USQConnect for this course.
- 12 The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner. Students must retain a copy of each item submitted for assessment. This must be produced within 24 hours if required by the Examiner. The Examiner may grant an extension of the due date of an assignment in extenuating circumstances.
- 13 The Faculty will normally only accept assessments that have been written, typed or printed on paper-based media. The Faculty will NOT accept submission of assignments by facsimile.
