RATIONALE

The teaching-learning process is a highly complex one, requiring personal reflection and an adeptness on the part of the professional educator in responding to the demands placed upon the teaching profession. The beginning teacher needs to have a critical familiarity with current dominant views of what constitutes curriculum and pedagogy, and of the forces that come into play in advancing some forms of these and retarding the development of alternatives. In becoming familiar with current discourse, the beginning teacher is more empowered to make practical judgements in given contexts.

SYNOPSIS

This course develops the theoretical perspectives presented in Introduction to Curriculum and Pedagogy (EDU1010) and deals with current initiatives in curriculum design, particularly the move to outcomes-based curriculum, and the pedagogical implications of contemporary ideas of knowledge, its construction and practice. The beginning teacher will draw on this content to reflect on curriculum and pedagogical practice in different contexts to demonstrate skills in planning and teaching. Intending students should be aware that they require regular access to electronic resources including email and the Internet. **IMPORTANT NOTE:** Working with Children: State law in Queensland requires that all adults (including university students, pre-service educators, trainers, vocational teachers, industry educators) working with children under the age of 18, in the State of Queensland*, obtain approval before commencing such work. Many education courses include a practical component (professional experience, project work, research, assessment etc.) that may require engagement with children under the age of 18. It is your responsibility to ensure that you possess a current suitability card (Blue Card)

before commencing any practical components of this course. DO NOT PARTICIPATE IN ANY PRACTICAL EXPERIENCE WITH CHILDREN UNDER 18 UNLESS YOU POSSESS A CURRENT 'BLUE CARD'. For further information:
