Moderator: Steven Christensen

RATIONALE

Psychology is concerned with understanding why people act and think as they do and how people differ. This course is designed to provide students with an understanding of the major concepts, techniques, and theoretical perspectives in psychology. Students will gain an appreciation of the main fields within the discipline and learn about the standard format for referencing in psychology.

SYNOPSIS

This course is designed to provide students with an overall perspective of the scope, nature, and methods of psychology. The major concepts of developmental psychology, personality, motivation, psychological disorders, therapy, health, and social psychology are introduced. Students will learn the correct procedures for citing references and putting together a reference list in the format recommended by the American Psychological Association (APA).

OBJECTIVES

On completion of this course students will be able to:

1. demonstrate an understanding of the scope of psychology and the relationship between its fields;
2. demonstrate an understanding of the major contemporary perspectives in psychology;
3. demonstrate a knowledge of the basic concepts and techniques of psychology;
4. apply the style and format requirements outlined in the latest edition of the Publication Manual of the American Psychological Association; and
5. demonstrate an understanding of the role of research in psychology.

TOPICS

	Description	Weighting (%)
1.	What is Psychology? - defining psychology - fields of psychology - history of psychology - research methods - ethics in psychological research	7.00
2.	Developmental Psychology - prenatal development - childhood: physical, cognitive, and social development - adolescence: physical, cognitive, and social development - adulthood: physical, cognitive, and social development - controversies in developmental psychology	15.00

2.5 HR M/C RESTRICTED EXAM	110.00	55.00	END S1 (see note 1)

NOTES

1. Examination dates will be available during the semester. Please refer to the examination timetable when published.

IMPORTANT ASSESSMENT INFORMATION

- 1 Attendance requirements:

It is the student's responsibility to actively participate in all classes scheduled for them, and to study all material provided to them or required to be accessed by them to

maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.

- 2 Requirements for students to complete each assessment item satisfactorily:
To complete the examination satisfactorily, students must obtain at least 50% of the marks available for the examination.
- 3 Penalties for late submission of required work:
If students submit assignments after the due date without prior approval then a penalty of 10% of the total marks available for the assignment will apply for each working day late.
- 4 Requirements for student to be awarded a passing grade in the course:
To be assured of a pass in this course, students must obtain an overall mark of at least 50%, complete all assessment items, and satisfactorily complete the exam.
- 5 Method used to combine assessment results to attain final grade:
Final grades for students will be determined by the addition of the marks obtained in each assessment item, weighted as in the Assessment details and by considering the students' level of achievement of the objectives of the course.
- 6 Examination information:
In a Restricted Examination, candidates are allowed access to specific materials during the examination. The only materials that candidates may use in the restricted examination for this course are: writing materials (non-electronic and free from material which could give the student an unfair advantage in the examination); calculators which cannot hold textual information (students must indicate on their examination paper the make and model of any calculator(s) they use during the examination; English translation dictionaries (but not technical dictionaries); Formula sheets; Translation dictionary. With the Examiner's approval, candidates may, take an appropriate non- electronic translation dictionary into the examination. This will be subject to perusal and, if it is found to contain annotations or markings that could give the candidate an unfair advantage, it may be removed from the candidate's possession until the appropriate disciplinary action is completed.
- 7 Examination period when Deferred/Supplementary examinations will be held:
Students who, for medical family/personal, or employment-related reasons, are unable to sit for an examination at the scheduled time may apply to defer an assessment in a course. Such a request must be accompanied by appropriate supporting documentation. Students will be granted a deferred examination only if they perform satisfactorily in all other assessment items. Any deferred examinations for this course will be held during the examination period at the end of the semester of the next offering of this course.
- 8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL <http://www.usq.edu.au/corporateservices/calendar/part5.htm> or in the current USQ Handbook.

ASSESSMENT NOTES

- 9 The due date for an assignment is the date by which a student must despatch an assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner. Students must retain a copy of each item submitted

for assessment purposes. Such copies should be dispatched to the USQ within 24 hours of receipt of a request to do so.

- 10 Students do not need to request an extension from the Examiner if they submit their assignment within one week of the due date. Assignments submitted more than one week after the due date, without an extension approved by the Examiner, will attract a penalty of 10 percent of the total marks available for the assignment for each working day (or part thereof) that the assignment is late. Extensions will usually not be granted for workload reasons unless it can be shown that your work commitments prior to the due date for the assignment were above and beyond your normal duties or responsibilities. In such cases, a letter from your employer would be required. If you think you have grounds for an extension, you must apply in advance. A covering letter and appropriate documentation must be submitted with the assignment. No assignment will be accepted after marked copies have been returned to students.
- 11 As there are resources cited in the Study Materials that are available of the World Wide Web, and a discussion group that will be used throughout the course, students undertaking this course will require access to email and Internet access to USQConnect to enable them to participate fully in the course.
