### RATIONALE

Teachers are grappling with significant changes in educational initiatives, curriculum, societal expectations and the concept of teaching in the 21st Century. What does it mean to teach in a world of multiliteracies where lifelong learning is promoted more highly than the traditional content; where the knowledge of information is surpassed by the process of locating and synthesizing information for a purpose; where the traditional 3Rs have been replaced by the 3Ts (thinking, teamwork and technology); and where ICTs pervade? Adolescent learners demand an integrated curriculum which is relevant and learning activities that will enable them to gain skills which can be used beyond their schooling. This course builds on previous studies and provides beginning educators opportunities to continue to build their own personal pedagogical practice, to redefine these in light of their workplace experiences, and provides familiarity with the literature on effective teaching and learning. Students will investigate what it means to be an educator in the 21st century, examine current curriculum, assessment and pedagogy in an integrated context.

### SYNOPSIS

This course seeks to provide learning opportunities (both on-campus and in professional experience) that will require pre-service teachers to play an active role in the construction of their own pedagogical practice and the development of professional expertise in planning and delivering effective teaching and learning. Effective teachers question, criticise and reformulate their assumptions about the nature of their work. Reflective practice promotes continued analysis, critique and interpretation of curriculum and pedagogical initiatives that impact on the work of educators. Through a range of on-campus and professional experience-related activities, the course aims to provide opportunities for students to develop their general pedagogical knowledge, curriculum knowledge and pedagogical content knowledge. Content knowledge refers to those broad principles and strategies of management and organisation that appear to transcend subject

matter. Curriculum knowledge refers to particular grasp of materials and programs that serve as 'tools of trade' for teachers, and pedagogical content knowledge is seen as a special amalgam of content and pedagogy that is uniquely the province of educators - their own form of professional understanding. Students undertaking this course are required to complete a 15 day professional experience placement in an approved educational setting. **IMPORTANT NOTE:** Working with Children: State law in Queensland requires that all adults (including university students, pre-service educators, trainers, vocational teachers, industry educators) working with children under the age of 18, in the State of Queensland\*, obtain approval before commencing such work. Many education courses include a practical component (professional experience, project work, research, assessment etc.) that may require engagement with children under the age of 18. It is your responsibility to ensure that you possess a current suitability card (Blue Card) before commencing any practical components of this course. **DO NOT PARTICIPATE IN ANY PRACTICAL EXPERIENCE WITH CHILDREN UNDER 18 UNLESS YOU POSSESS A CURRENT 'BLUE CARD'**. For further information: <http://www.childcomm.qld.gov.au/employment/bluecard/informationSheets.html> \*If you are undertaking practical experience outside the State of Queensland, Australia you should check local requirements.
