RATIONALE

To be able to teach languages, instructors need to be aware of what language is, how it can be described in terms of phonology, semantics and syntax, and how the meaning potential of language is realised in actual usage. Teachers also need to be aware of some recent theories of language as well as an understanding that language operates in a social domain that determines how it is used and how it positions the users.

SYNOPSIS

Students will be introduced to what language is, how it can be described in terms of phonology, semantics and syntax, and how the meaning is realised in actual usage. They will be also introduced to some recent theories of language as well as how language operates in a social domain. **IMPORTANT NOTE: Working with Children: State law in Queensland requires that all adults (including university students, pre-service educators, trainers, vocational teachers, industry educators) working with children under the age of 18, in the state of Queensland*, obtain approval before commencing such work. Many education courses include a practical component (professional experience, project work, research, assessment etc.) that may require engagement with children under the age of 18. It is your responsibility to ensure that you possess a current suitability card (Blue Card) before commencing any practical components of this course. DO NOT PARTICIPATE IN ANY PRACTICAL EXPERIENCE WITH CHILDREN UNDER 18 UNLESS YOU POSSESS A CURRENT BLUE CARD .** For further information: <http://www.childcomm.qld.gov.au/employment/bluecard/informationSheets.html>. *If you are undertaking practical experience outside the state of Queensland, Australia you should check local requirements.

OBJECTIVES

At the end of the course students will show an understanding of:

1. the complex interrelations between phonology, semantics, syntax and pragmatics in the production of meaning by discussing these relationships and giving concrete examples of them;
2. systemic linguistics and show an awareness of other theories of language;
3. the relationships between language, society and culture by describing how language varieties and language use are intertwined with social and cultural factors.
