STAFFING

Examiner: Tony Roberts

Moderator: Harry Butler

REQUISITES

Pre-requisite: MAT2100 and MAT3103

OTHER-REQUISITES

Recommended prior study: MAT3105 and STA2300 and CSC2409

RATIONALE

Dynamical systems describe how any system of interest evolves in time. Nonlinear dynamics generally give rise to chaos. A modern understanding and appreciation of chaos is essential for all scientists in any field of endeavour which seeks to understand and quantify evolution.

SYNOPSIS

Contact the Examiner to study this course by distance education. This course introduces concepts, analysis and appearances of chaos in dynamical systems, both theoretically and in applications. The approach is in the context of modern dynamical systems theory and relies mainly upon geometrical intuition rather than algebraic virtuosity. Starting from a classical view of dynamics, the course discusses strange attractors, the analysis of chaotic data series, and the period doubling and intermittent routes to chaos. This course is normally offered only in odd years.

OBJECTIVES

On completion of this course students will be able to:

1. appreciate the classic view of nonlinear dynamics;
2. demonstrate an understanding of the generic features of chaos and strange attractors in continuous time dynamical systems, and in discrete maps;
3. analyse an experimental data series for signs of chaos, and to compute some quantifiable characteristics;

4. demonstrate an understanding of some of the finer features of chaotic dynamics through analysis of the period doubling and intermittent routes to chaos.

TOPICS

| | Description | Weighting (%) |
|----|--|---------------|
| 1. | Order: state space, equilibria, oscillations, quasi-periodic dynamics, Fourier transforms | 20.00 |
| 2. | Strange attractors: stretching and folding, Lyapunov exponents, 1D return maps, fractal microstructure | 20.00 |
| 3. | Data analysis: state space reconstruction, inverse problem, chaotic prediction, noise | 20.00 |
| 4. | Subharmonic cascade: return maps, period doubling, inverse cascade, renormalisation, universality | 20.00 |
| 5. | Intermittency: bursts and laminar phases, 1/f noise, renormalisation | 20.00 |

TEXT and MATERIALS required to be PURCHASED or ACCESSED

ALL textbooks and materials are available for purchase from USQ BOOKSHOP (unless otherwise stated). Orders may be placed via secure internet, free fax 1800642453, phone 07 46312742 (within Australia), or mail. Overseas students should fax +61 7 46311743, or phone +61 7 46312742. For costs, further details, and internet ordering, use the 'Textbook Search' facility at <http://bookshop.usq.edu.au> click 'Semester', then enter your 'Course Code' (no spaces).

Students will require access to computer facilities for simulations.
(Students will require access to computer facilities for simulations.)

REFERENCE MATERIALS

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

STUDENT WORKLOAD REQUIREMENTS

| ACTIVITY | HOURS |
|----------------|--------|
| Assessment | 43.00 |
| Consultation | 7.00 |
| Directed Study | 115.00 |
| Examinations | 3.00 |

ASSESSMENT DETAILS

| Description | Marks out of | Wtg(%) | Due date |
|---------------------|--------------|--------|-------------|
| ORDER | 20.00 | 10.00 | 27 Mar 2006 |
| STRANGE ATTRACTORS | 20.00 | 10.00 | 10 Apr 2006 |
| DATA ANALYSIS | 20.00 | 10.00 | 15 May 2006 |
| SUBHARMONIC CASCADE | 20.00 | 10.00 | 05 Jun 2006 |
| SUMMARY ASSESSMENT | 100.00 | 60.00 | 03 Jul 2006 |

IMPORTANT ASSESSMENT INFORMATION

1 Attendance requirements:

It is the students' responsibility to attend and participate appropriately in all activities (such as lectures, tutorials, laboratories and practical work) scheduled for them, and to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.

2 Requirements for students to complete each assessment item satisfactorily:

To complete each of the assessment items satisfactorily, students must obtain at least 50% of the marks available for each assessment item.

3 Penalties for late submission of required work:

If students submit assignments after the due date without prior approval then a penalty of 20% of the total marks available for the assignment will apply for each working day late.

- 4 Requirements for student to be awarded a passing grade in the course:
To be assured of a passing grade, students must demonstrate, via the summative assessment items, that they have achieved the required minimum standards in relation to the objectives of the course by satisfactorily completing all summative assessment items (the examination and assignments).
- 5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the weighted aggregate of the marks obtained for each of the summative assessment items in the course.
- 6 Examination information:
There is no examination in this course.
- 7 Examination period when Deferred/Supplementary examinations will be held:
As there are no examinations in this course, there will be no deferred or supplementary examinations.
- 8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL <http://www.usq.edu.au/corporateservices/calendar/part5.htm> or in the current USQ Handbook.

ASSESSMENT NOTES

- 9 The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner.
- 10 Students may be required to provide a copy of assignments submitted for assessment purposes. Such copies should be despatched to the USQ within 24 hours of receipt of a request to do so.

OTHER REQUIREMENTS

- 1 Students will require access to e-mail and internet access to USQConnect for this course.
-
