RATIONALE

Rapid changes in secondary schools and the growing diversity of contexts place intense demands on the role of teachers. This course provides further professional (field) experience in a new context. The student will have further opportunity for bringing together both theory and practical components of the program. The integration of the theory with the active daily tasks associated with a teaching career is an essential step in the transition from tertiary institution to the professional work place.

SYNOPSIS

The in-school experience to date has enabled students to be involved in the normal day to day running of a school in one context. This course offers the student an extensive period in the field in a new context. The professional experience will require involvement in the planning and implementation of courses of work along with the daily administrative and professional requirements of a teacher. The experience will require pre-service teachers to play an active role in the construction of their own practical theories. Their in-school experience will enable them to question, criticize and reformulate their assumptions about the nature of teachers' work. **IMPORTANT NOTE: Working with Children: State law in Queensland requires that all adults (including university students, pre-service educators, trainers, vocational teachers, industry educators) working with children under the age of 18, in the State of Queensland*, obtain approval before commencing such work. Many education courses include a practical component (professional experience, project work, research, assessment etc.) that may require engagement with children under the age of 18. It is your responsibility to ensure that you possess a current suitability card (Blue Card) before commencing any practical components of this course. DO NOT PARTICIPATE IN ANY PRACTICAL EXPERIENCE WITH CHILDREN UNDER 18 UNLESS YOU POSSESS A CURRENT 'BLUE CARD'. For further information:**
