RATIONALE

The study of developmental psychology provides a background understanding of human functioning in a variety of important areas (e.g.) physical, social, emotional, and intellectual). Knowledge about child and adolescent development should be considered by anyone wanting to provide the best opportunities for enhancing the development of young people.

SYNOPSIS

The three goals of developmental psychology are to describe, explain, and optimise human development. This course provides students with the knowledge necessary to achieve these goals. The course takes a life-span approach, but concentrates on the earliest phases, from conception through adolescence, introducing students to the challenges, achievements, and difficulties encountered at each phase.

OBJECTIVES

On completion of this course, students should be able to demonstrate an understanding of:

1. the origin and meaning of developmental psychology, and the concept of life-span development;
2. the determinants of human development-genetic and environmental;
3. the important theoretical approaches in developmental psychology and the major theorists;
4. the phases of human development;
5. the major challenges, achievements, and difficulties encountered at each of the following phases-prenatal, infancy, toddlerhood, childhood, and adolescence, in the following realms of interest: physical and perceptual development, cognitive development, language development, learning and intellectual development, personality and emotional development, gender roles and sexuality, motivation and moral development, social development, family role changes and lifestyle changes;
6. the three goals of developmental psychology and ways of achieving these goals;

IMPORTANT ASSESSMENT INFORMATION

- 1 Attendance requirements:
There are no attendance requirements for this course. However, it is the students' responsibility to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.
- 2 Requirements for students to complete each assessment item satisfactorily:
To complete each of the assessment items satisfactorily, students must obtain at least 50% of the marks available for each assignment. Students may be required to resubmit an assignment or complete extra work for each assignment that is unsatisfactory.
- 3 Penalties for late submission of required work:
If students submit assignments after the due date without prior approval then a penalty of 5% of the total marks available for the assignment may apply at the discretion of the examiner for each working day late.
- 4 Requirements for student to be awarded a passing grade in the course:
To be assured of a passing grade, students must demonstrate, via the summative assessment items, that they have achieved the required minimum standards in relation to the objectives of the course by satisfactorily completing all summative assessment items.
- 5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the weighted aggregate of the marks obtained for each of the summative assessment items in the course.
- 6 Examination information:
There is no examination in this course.
