(See "Other Requirements" for further information.) Also see:

<http://www.childcomm.qld.gov.au/employment/bluecard/informationSheets.html>.

### RATIONALE

Educators are continually required to update and modify their approach and practices due to reconceptualisation of childhood and an increased awareness of children's rights. Furthermore, research has also impacted greatly on the role of early childhood educators and the importance of providing quality care experiences, programs and environments for young children (Arthur, Beecher, Farmer, Docket and Death, 2005). It is imperative that as educators we acknowledge the importance of the environment in which young children interact and understand its role in influencing the learning and interactions in this environment.

### SYNOPSIS

Effective learning environments in early childhood education are characterised by flexibility and responsiveness to children and are planned in relation to a range of ecological and educational considerations. At a macro level, a variety of social, economic, political and educational trends impact on policy and regulatory requirements and on family or community expectations. At a micro level, organisation of a learning environment, including not only physical issues but also time and interpersonal issues, is modified regularly in response to the current interests and progress of children and the needs of staff and parents. In this course, learning environments for young children birth to four are explored. An integral part of this course also explores the necessity for early childhood practitioners to engage in reflective practice as a means of accessing current

practices and critically analysing other aspects of quality care. This course emphasises literacy correctness in all its forms.

## OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:
