RATIONALE

Socio-cultural and socio-political factors are powerful influences on the environments in which educators conduct their work in educational sites and, in turn, on the environments that they establish for their work with learners. In the broader context of globalisation, with its attendant homogenising forces, inclusive practice needs to recognise the differences that learners and communities bring to the learning context. In order to design educational environments that are socially just and inclusive, educators require an understanding of the socio-cultural realities of learners and the positioning of educational sites within particular cultural contexts and locations.

SYNOPSIS

This course is designed to assist students to understand the range of social and political forces that interact to shape the nature of educational contexts and environments within educational sites, as well as the cultural identities of the individuals within those sites. Understandings of these forces and trends are connected to exploration of whole-site and individual-educator approaches to the establishment of inclusive learning environments. Awareness of how particular sites respond to particular features of their socio-cultural communities is explored through the lens of a social justice approach to meeting the needs of "at risk" groups. The course provides for a nominal 7.5 days of professional attachment to an identified site. During this period of attachment learners will be immersed in the day-to-day operations of the site and in the work of an educator, with a particular focus on the connections between that work and the issues covered in this course.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:

1. identify the key elements of inclusive learning environments (Assignment and Professional attachment)
2. demonstrate knowledge of the socio-cultural, legislative, systemic and educational contexts that inform quality teaching and training for diversity (Assignment and Professional attachment)
3. understand the application of ecological theory in a particular context (Assignment and Professional attachment)
4. identify the implications and ramifications of actions taken at different levels of an education system (Assignment and Professional attachment)
5. apply whole of site and community approaches to social justice in education (Assignment and Professional attachment)
6. demonstrate knowledge, understanding and skill in the use of appropriate personal, professional and academic literacies (Assignment and Professional attachment)
7. demonstrate knowledge, understanding and application of appropriate ICT uses for teaching and learning in a particular context (Assignment and Professional attachment)
8. apply an understanding of contexts and environments in the professional attachment (Assignment and Professional attachment)
9. articulate an example of how the key concepts encountered in this course can be applied in an educational setting. (Assignment and Professional attachment)
