RATIONALE

Now that beginning educators have been exposed to the essential elements of curriculum and pedagogy, and are familiar with the key concepts pertaining to general curriculum documentation or to their areas of specialization, this course promotes further investigation into the essential knowledges, skills and competencies necessary for effective planning and teaching in a range of educational contexts from a transdisciplinary perspective. An essential component of this course is that it involves professional context-based planning in an appropriate location

SYNOPSIS

This course builds on elements of curriculum theory and practice gained in previous curriculum and pedagogy courses and professional experience through an investigation of negotiated context based curriculum issues using a transdisciplinary approach. For example, authentic planning and assessment, literacy across curriculum areas, equity issues, effective resources, ICTs etc. This course promotes opportunities to investigate transdisciplinary links, nurture proactive practices in a supportive environment, and develop confidence and enthusiasm to implement innovative curriculum plans developed in partnership with a mentor in an appropriate professional context.
