RATIONALE

Teachers are grappling with significant changes in educational initiatives, curriculum, societal expectations and the concept of teaching in the 21st Century. What does it mean to teach in a world of multiliteracies where lifelong learning is promoted more highly than the traditional content; where the knowledge of information is surpassed by the process of locating and synthesizing information for a purpose; where the traditional 3Rs have been replaced by the 3Ts (thinking, teamwork and technology); and where ICTs pervade? Adolescent learners demand an integrated curriculum which is relevant and learning activities that will enable them to gain skills which can be used beyond their schooling. This course builds on previous studies and provides beginning educators opportunities to continue to build their own personal pedagogical practice, to redefine these in light of their workplace experiences, and provides familiarity with the literature on effective teaching and learning. Students will investigate what it means to be an educator in the 21st century, examine current curriculum, assessment and pedagogy in an integrated context.

SYNOPSIS

This course seeks to provide learning opportunities (both on-campus and in professional experience) that will require pre-service teachers to play an active role in the construction of their own

pedagogical practice and the development of professional expertise in planning and delivering effective teaching and learning. Effective teachers question, criticise and reformulate their assumptions about the nature of their work. Reflective practice promotes continued analysis, critique and interpretation of curriculum and pedagogical initiatives that impact on the work of educators. Through a range of on-campus and professional experience-related activities, the course aims to provide opportunities for students to develop their general pedagogical knowledge, curriculum knowledge and pedagogical content knowledge. Content knowledge refers to those broad principles and strategies of management and organisation that appear to transcend subject matter. Curriculum knowledge refers to particular grasp of materials and programs that serve as 'tools of trade' for teachers, and pedagogical content knowledge is seen as a special amalgam of content and pedagogy that is uniquely the province of educators - their own form of professional understanding. Students undertaking this course are required to complete a 15 day professional experience placement in an approved educational setting.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:

IMPORTANT ASSESSMENT INFORMATION

- 1 Attendance requirements:
It is the students' responsibility to attend and participate appropriately in all activities (such as lectures, tutorials, laboratories and practical work) scheduled for them, and to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration. Regular attendance at weekly workshops is expected. Students are required to complete all 15 days of the field experience component of this course. Students unable to attend field experience MUST notify the school and the course examiner.
