OTHER REQUISITES

RATIONALE

Educators in all settings should be aware of the rich variety of approaches to teaching which may be employed to develop their own repertoire. The models of instruction presented in this course have been developed from a disciplined inquiry into teaching. The purpose of all teaching is to increase the individual's capacity to learn. Effective teaching will help learners to develop the necessary strategies and techniques needed to educate themselves. John Dewey defined the core of the teaching process as the arrangement of environments within which students can interact and study how to learn. Models of instruction assist educators to create that learning environment.

SYNOPSIS

In this course students will engage in advanced and critical analysis of instructional practice with particular attention being given to a range of traditional, contemporary mainstream and alternative models of instruction appropriate to a range of desired learning outcomes and learner groups. Students will be required to engage in, and evaluate, a range of these models in the actual delivery of instruction to learners. NOTE: Field (instructional) experience comprises a major component of this course with students being required to undertake some of this instructional experience in educational/training contexts involving adult and/or adolescent learners.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On successful completion of this course students will be able to:

1. identify the role of educator in terms of alternative models of teaching which facilitate learning (Assignments 1 and 2)
2. decide and justify the relevance, effectiveness and application of one or more models of teaching to achieve specific education objectives in the particular situation in which the teacher/trainer is working (Assignments 1 and 2)
3. describe the syntax, social system, principles or reaction, support system and application of the model or models which he/she is currently using in a specific context (Assignments 3 and 4)
4. demonstrate in an actual instructional situation the ability to utilise a model or combination of models of teaching in a specific teaching/training environment. (Assignments 3 and 4)

OTHER REQUIREMENTS

- 1 Students will require access to e-mail and Internet access to USQConnect for this course.
- 2 Students are to use a recognised referencing system as specified by the examiner.
- 3 **IMPORTANT NOTE:** Working with Children: State law in Queensland requires that all adults (including university students, pre-service educators, trainers, vocational teachers, industry educators) working with children under the age of 18, in the State of Queensland*, obtain approval before commencing such work. Many education courses include a practical component (professional experience, project work, research, assessment etc.) that may require engagement with children under the age of 18. It is your responsibility to ensure that you possess a current suitability card (Blue Card) before commencing any practical components of this course. **DO NOT PARTICIPATE IN ANY PRACTICAL EXPERIENCE WITH CHILDREN UNDER 18 UNLESS YOU POSSESS A CURRENT 'BLUE CARD'.** For further information:
<http://www.childcomm.qld.gov.au/employment/bluecard/informationSheets.html> *If you are undertaking practical experience outside the State of Queensland, Australia you should check local requirements.
- 4 This course involves both a theory and a practical component. Information about the theory component is provided in the previous sections. The practical component requires students to negotiate a professional experience placement in an approved instructional setting that will involve opportunities for planning, implementation and evaluation of actual instruction for a minimum of 25 hours during the period of their enrolment in the course. The nature of the approved instructional setting depends on program enrolment. For students in the BEd(FET), and hence seeking teacher registration, these 25 hours contribute to the overall professional experience requirements set out by the Queensland College of Teachers. Specifically, students will be required to: 1. Ensure that they have obtained and submitted evidence (to the Professional Experience Office) of possession of a current Working with Children Suitability Card prior to undertaking any professional experience. 2. Make arrangements to undertake a supervised practicum in an approved instructional setting and submit the Teaching Placement Agreement Form to the Course Examiner with required attachments for approval prior to commencing any instructional experience. 3. Receive a letter of approval from the Professional Experience Office before commencing the placement. 4. Arrange for supervision during their practicum from a suitably qualified and experienced Teaching Mentor/Supervisor, who will complete formative and summative assessments of students' teaching (special requirements exist for BEd(FET) students). 5. Obtain permission utilising the appropriate Video Clearance Forms for one of their instructional sessions to be videotaped for assessment by the Course Examiner. 6. Maintain a Professional Experience Diary in which details of each instructional session are entered for submission to the Course Examiner prior to completion

of the course. NB: Students who do not adhere to these requirements will be deemed not to have successfully completed the course.
