

The University of Southern Queensland

Course specification

This version produced 20 Dec 2007.

The current and official versions of the course specifications are available on the web at
<<http://www.usq.edu.au/coursespecification/current>>.

Please consult the web for updates that may occur during the year.

Description: Mathematics Communication Level D

Subject	Cat-nbr	Class	Term	Mode	Units	Campus
UNP	7384	63169	1, 2007	ONC	1.00	Springfield

Academic group: INTOF

Academic org: INT002

Student contribution band: 2

ASCED code: 010199

STAFFING

Examiner: Robyn Pigozzo

Moderator: Lyndal Wood

RATIONALE

This course is designed to provide students with the basic mathematical competencies for entry into the Bachelor of Information Technology (Maths and Computing) or Bachelor of Science (Applied Mathematics). Students also need to develop and practise language and problem solving skills in the English so that they can build upon their existing knowledge and express themselves adequately in the mathematical context. This course is designed to allow students to appreciate the diverse applications and power of mathematics; the precise language and structure of mathematics; and to develop confidence and reduce anxiety by using mathematics skills in a variety of problem solving sessions.

SYNOPSIS

There are two compulsory parts of the course. Part A consists of the mastery of the content of selected topics within algebra, matrices, geometry, trigonometry, differentiation, integration. Part B consists of group work designed to develop the mathematical communication and problem solving skills of students. This work utilises some of the content mastered in Part A of the course.

OBJECTIVES

On successful completion of this course students will be able to:

1. demonstrate an understanding of mathematical topics essential for tertiary study as detailed below;
2. demonstrate an ability to select and use appropriate technology such as calculators, measuring instruments and computers with selected software;
3. select and use appropriate mathematical procedures;
4. work accurately and manipulate formulae;
5. transfer and apply mathematical procedures to a range of situations;

6. demonstrate problem solving through using a range of problem solving strategies, selecting appropriate mathematical procedures, identifying the problem, reflecting on the solutions, extending and generalizing from problems:
7. On successful completion of this course, students will be able to demonstrate communication through:
8. understanding, organising and presenting information in a variety of forms (such as oral, written, symbolic, pictorial and graphical);
9. using mathematical terms and symbols accurately and appropriately;
10. using accepted spelling, punctuation and grammar in written communication;
11. translating material from one form to another when appropriate (eg words to formulas);
12. recognising necessary distinctions in the meanings of words and phrases according to whether they are used in a mathematical or non-mathematical situation.
13. Write sentences and paragraphs in class on class-related activities.
14. Write prepared sentences, paragraphs and report on class-related activities.

TOPICS

	Description	Weighting (%)
1.	Managing Mathematics - study strategies and planning to study mathematics	1.00
2.	Arithmetic - calculations, fractions, scientific notation, metric system	6.00
3.	Algebra - algebraic indices and fractions, solving linear and quadratic equations, factorisation, simultaneous equations	16.00
4.	Relations and Functions - analytical geometry, definition of functions and relation, graphs of straight lines, parabolas, circles, hyperbolas, graphical solution of equations	15.00
5.	Exponential and Logarithmic Functions - exponential and logarithmic functions and graphs, solution of exponential and logarithmic equations	12.00
6.	Matrices and Vectors - definition of matrices, matrix operations	10.00
7.	Trigonometry - trig ratios and identities, solution of triangles, trigonometric functions and graphs, solutions of trigonometric equations	15.00
8.	Calculus - nature of differentiation and integration, differentiation and integration of simple functions, applications of differentiation and integration	25.00

TEXT and MATERIALS required to be PURCHASED or ACCESSED

ALL textbooks and materials are available for purchase from USQ BOOKSHOP (unless otherwise stated). Orders may be placed via secure internet, free fax 1800642453, phone 07 46312742 (within Australia), or mail. Overseas students should fax +61 7 46311743, or phone +61 7 46312742. For costs, further details, and internet ordering, use the 'Textbook Search' facility at <http://bookshop.usq.edu.au> click 'Semester', then enter your 'Course Code' (no spaces).

Students are expected to have a scientific calculator and Course MAT1100 Foundation Mathematics - Study Book C.

Galligan, et al. 2005, *Applied communication/Mathematics communication: introductory book*, University of Southern Queensland, Toowoomba.

Galligan, et al. 2005, *Applied communication/Mathematics communication: problem solving book*, University of Southern Queensland, Toowoomba.

REFERENCE MATERIALS

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

STUDENT WORKLOAD REQUIREMENTS

ACTIVITY	HOURS
Assessment	39.00
Directed Study	52.00
Private Study	80.00

ASSESSMENT DETAILS

Description	Marks out of	Wtg(%)	Due date
TEST 9	20.00	6.00	09 Mar 2007
TEST 10	20.00	6.00	20 Apr 2007
TEST 11	22.00	7.00	20 Apr 2007
ASSIGNMENT 2 - REPORT	24.00	12.00	11 May 2007
ASSIGNMENT 3 - STOCK MARKET	30.00	12.00	18 May 2007
TEST 12	17.00	7.00	08 Jun 2007
TEST 13	19.00	7.00	08 Jun 2007
TEST 14	19.00	7.00	08 Jun 2007
ASSIGNMENT 1 - STUDENT PROBLEM	20.00	6.00	08 Jun 2007
ASSIGNMENT LOGS	12.00	10.00	08 Jun 2007
REVISION TEST	40.00	20.00	11 Jun 2007

IMPORTANT ASSESSMENT INFORMATION

1 Attendance requirements:

Students are required to attend at least 80% of the mathematics communication group work and worksheet sessions and ensure their attendance is registered with the staff member in charge of the activity. It is the students' responsibility to study all course material to pass assessment items and seek support as necessary.

- 2 Requirements for students to complete each assessment item satisfactorily:
Refer to statement 4 below for the requirements to receive a passing grade in this course. All assessment items must be received prior to the start of the examination period for the semester in which the course is offered. Students may be required to re-submit an assessment piece that is unsatisfactory.
- 3 Penalties for late submission of required work:
If students submit assignments after the due date without an approved extension of time then a penalty of 5% of the total marks available for the assignments may apply for each day late.
- 4 Requirements for student to be awarded a passing grade in the course:
To be assured of receiving a passing grade a student must attempt all of the summative assessment items, achieve at least 50% in the final test, 50% in the tests, 50% in the weighted marks in the assignment and logs and at least 50% of the total weighted marks available for the course. Students who do not qualify for a Passing grade may, at the discretion of the Examiner, be assigned additional work to demonstrate to the Examiner that they have achieved the required standard. It is expected that such students have gained at least 40% of the total marks available for all assessment items.
- 5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the weighted aggregate of the marks obtained for each of the summative assessment items in the course.
- 6 Examination information:
Examinations in this course are restricted examinations. In a Restricted Examination, candidates are allowed access to specific materials during the examination. The only materials the candidates can use in the Restricted Examination for this course are: writing materials (non-electronic and free from material which could give the student an unfair advantage in the examination); calculators which cannot hold textual information (students must indicate on their examination paper the make and model of any calculator (s) they use during the examination); 1 A4 page of hand written or typed notes (written on both sides).
- 7 Examination period when Deferred/Supplementary examinations will be held:
Any Deferred or Supplementary examination will be held within four weeks following the examintaion period by arrangement with the examiner.
- 8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL <http://www.usq.edu.au/corporateservices/calendar/part5.htm> or in the current USQ Handbook.

ASSESSMENT NOTES

- 1 Students must retain a copy of each item submitted for assessment. This must be produced within 24 hours if required by the Examiner. In accordance with the University's Assignment Extension Policy (Regulation 5.6.1), the examiner of a course may grant an extension of the due date of an assignment in extenuating circumstances.

OTHER REQUIREMENTS

- 1 Part A requires you to work through a series of tests to demonstrate your understanding of mathematical topics.

- 2 Part B consists of different activities each week. Students must participate actively in the group work of the problem solving sessions. Students also must submit written work as required.
-
