Please consult the web for updates that may occur during the year.

Description: Engineering Statics

Subject	Cat-nbr	Class	Term	Mode	Units	Campus
CIV	1501	84254	3, 2008	EXT	1.00	Toowoomba

Academic group:	FOENS
Academic org:	FOES03
Student contribution band:	2
ASCED code:	030903

STAFFING

Examiner: Jayantha Epaarachchi
Moderator: Santhi S Santhikumar

REQUISITES

Pre-requisite: MAT1100

SYNOPSIS

The overall aim of this course is to introduce fundamental knowledge of one of the areas of rigid body-mechanics called "Statics" and elementary knowledge of mechanics of deformable bodies, in the context of engineering applications. This course deals with balanced force systems applied on rigid-bodies that are at rest. Methods to determine support reactions and relationships between internal and external forces, internal forces distribution and deformation of engineering structures, such as a steel bridge, will be introduced in this course. The knowledge gained in this course will be extensively used in engineering design analysis.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course, students should be able to:

1. explain what a vector is, express it in vector and scalar notation and use vector algebra to solve problems involving static equilibrium in 2 and 3 dimensions; (Assignment 1)
2. distinguish between a concentrated force, a distributed force, the moment of a force and a couple; (Assignment 1, 2 Hour Restricted Examination)
3. determine the centroid of an area and the first and second moments of area of plane shapes; (Assignment 1, 2 Hour Restricted Examination)
4. analyse the forces in pin-jointed trusses; (Assignment 1, 2 Hour Restricted Examination)
5. construct and evaluate shear force and bending moment diagrams for beams with a variety of loads and types of support; (Assignment 1, 2 Hour Restricted Examination)
6. apply Hooke's Law to problems of simple direct stress; (Assignment 2, 2 Hour Restricted Examination)

7. apply the Engineers' Theory of Bending; (Assignment 2, 2 Hour Restricted Examination)
8. apply principles of equilibrium, compatibility and constitutive relationships to the solution of statically indeterminate structures; (Assignment 2, 2 Hour Restricted Examination)
9. evaluate deflections in simple structures using the method of successive integration. (Assignment 2)
10. apply the principles of superposition to simple structures; (Assignment 2, 2 Hour Restricted Examination)

TOPICS

	Description	Weighting (%)
1.	Introduction - Fundamental Concepts of Force and Moment	10.00
2.	Static Equilibrium	12.00
3.	Analysis of Pin-jointed Trusses	10.00
4.	Friction and Stability	6.00
5.	Direct Stress and Strain, Elasticity, Energy	12.00
6.	Deflection of Simple Trusses using Energy Methods	10.00
7.	Properties of Sections	10.00
8.	Engineers Theory of Bending	10.00
9.	Analysis and Design of Simple Beams	10.00
10.	Deflection of Beams using Successive Integration	10.00

TEXT and MATERIALS required to be PURCHASED or ACCESSED

ALL textbooks and materials are available for purchase from USQ BOOKSHOP (unless otherwise stated). Orders may be placed via secure internet, free fax 1800642453, phone 07 46312742 (within Australia), or mail. Overseas students should fax +61 7 46311743, or phone +61 7 46312742. For costs, further details, and internet ordering, use the 'Textbook Search' facility at <http://bookshop.usq.edu.au> click 'Semester', then enter your 'Course Code' (no spaces).

Hibbeler, RC 2007, *Engineering mechanics: statics*, 11th edn, Prentice Hall, Singapore.

REFERENCE MATERIALS

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

There are many similar books which are every bit as useful as Meriam or Beer and Johnston. Check with the examiner if you are uncertain about a suitable reference book.

Beer, FP, Johnston, ER & DeWolf, JT 2006, *Mechanics of materials*, 4th edn, McGraw Hill, Boston.

(ISE S I Version. This textbook is set text for subsequent course MEC2402.)

Meriam, JL & Kraige, LG 2006, *Engineering mechanics*, 6th edn, Wiley, New York.

STUDENT WORKLOAD REQUIREMENTS

ACTIVITY	HOURS
Assessments	10.00
Directed Study	52.00
Examinations	2.00
Private Study	91.00

ASSESSMENT DETAILS

Description	Marks out of	Wtg (%)	Due date
ASSIGNMENT 1	150.00	15.00	02 Jan 2009
ASSIGNMENT 2	150.00	15.00	30 Jan 2009
2 HOUR RESTRICTED EXAMINATION	700.00	70.00	END S3 (see note 1)

NOTES

1. Student Administration will advise students of the dates of their examinations during the semester.

IMPORTANT ASSESSMENT INFORMATION

- 1 Attendance requirements:
There are no attendance requirements for this course. However, it is the students' responsibility to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.
- 2 Requirements for students to complete each assessment item satisfactorily:
To satisfactorily complete an individual assessment item a student must achieve at least 50% of the marks or a grade of at least C-. (Depending upon the requirements in Statement 4 below, students may not have to satisfactorily complete each assessment item to receive a passing grade in this course.)
- 3 Penalties for late submission of required work:
If students submit assignments after the due date without prior approval then a penalty of 5% of the total marks available for the assignment will apply for each working day late.
- 4 Requirements for student to be awarded a passing grade in the course:
To be assured of receiving a passing grade a student must achieve at least 50% of the total weighted marks available for the course.
- 5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the weighted aggregate of the marks (or grades) obtained for each of the summative assessment items in the course.
- 6 Examination information:
In a Restricted Examination, candidates are allowed access to specific materials during the examination. The only materials that candidates may use in the restricted examination for this course are: writing materials (non-electronic and free from material which could give the student an unfair advantage in the examination); calculators which cannot hold

textual information (students must indicate on their examination paper the make and model of any calculator(s) they use during the examination); Formula sheets will be provided with the exam paper.

- 7 Examination period when Deferred/Supplementary examinations will be held:
Any Deferred or Supplementary examinations for this course will be held during the examination period at the end of the semester of the next offering of this course.
- 8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL <http://www.usq.edu.au/corporateservices/calendar/part5.htm> or in the current USQ Handbook.

ASSESSMENT NOTES

- 1 The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner.
- 2 Students must retain a copy of each item submitted for assessment. This must be despatched to USQ within 24 hours if required by the Examiner.
- 3 In accordance with University's Assignment Extension Policy (Regulation 5.6.1), the examiner of a course may grant an extension of the due date of an assignment in extenuating circumstances.
- 4 The Faculty will normally only accept assessments that have been written, typed or printed on paper-based media.
- 5 The Faculty will NOT accept submission of assignments by facsimile.
- 6 Students who do not have regular access to postal services or who are otherwise disadvantaged by these regulations may be given special consideration. They should contact the examiner of the course to negotiate such special arrangements.
- 7 In the event that a due date for an assignment falls on the local public holiday in their area, such as a Show holiday, the due date for the assignment will be the next day. Student are to note on the assignment cover the date of the public holiday for the Examiner's convenience.
- 8 Students who have undertaken all of the required assessments in a course but who have failed to meet some of the specified objectives of a course within the normally prescribed time may be awarded one of the temporary grades: IM (Incomplete - Make up), IS (Incomplete - Supplementary Examination) or ISM (Incomplete -Supplementary Examination and Make up). A temporary grade will only be awarded when, in the opinion of the examiner, a student will be able to achieve the remaining objectives of the course after a period of non directed personal study.
- 9 Students who, for medical, family/personal, or employment-related reasons, are unable to complete an assignment or to sit for an examination at the scheduled time may apply to defer an assessment in a course. Such a request must be accompanied by appropriate supporting documentation. One of the following temporary grades may be awarded IDS (Incomplete - Deferred Examination; IDM (Incomplete Deferred Make-up); IDB (Incomplete - Both Deferred Examination and Deferred Make-up).

OTHER REQUIREMENTS

- 1 Students will require access to e-mail and internet access to USQConnect for this course.
