OTHER REQUISITES

State law in Queensland (Australia) requires that all adults working/undertaking professional experience/researching with children under the age of 18, in the state of Queensland are required to possess a current suitability card (Blue Card). (See "Other Requirements" for further information.) Also see: <http://www.childcomm.qld.gov.au/employment/bluecard/informationSheets.html>.

RATIONALE

An important outcome of study at the Masters level is for students to be able to plan and execute independent projects which consolidate and build upon and/or apply the capabilities developed through their programs of study. A 'capstone' project undertaken at, or towards, the end of the program is a suitable venue for demonstrating these capabilities. This course enables students to synthesise the knowledge and skills developed in earlier courses of their programs, into an approved professional project or academic paper focused on a key aspect of their areas of interest/specialisation.

SYNOPSIS

Learners will, with guidance from a member of academic staff, plan and execute an independent project which is clearly related to their overall program of study, especially to their area of major study. It is envisaged that normally this one-unit project will not involve formal research but it should include an investigative or developmental/evaluative component with clear evidence of application of the knowledge developed in the student's masters program. The project should lead to the preparation of a substantial written report presented at an appropriately scholarly standard. This report may be presented in the format of a paper for publication in an approved academic or professional journal. Project reports must reflect mastery of the content of current literature and

of knowledge and skills developed by the learner in his/her program of study. This course will operate on the basis of frequent individual consultation and feedback between the student and the staff member nominated as the study supervisor. Before enrolling in the course students are advised to discuss the nature, processes and anticipated outcomes of the proposed study topic or activity with a faculty member who might act as their study supervisor. Project proposals and on-going implementation will be critically reviewed through learner-supervisor ongoing interaction and negotiation. NOTES: 1. This course (FET8660) is available through INTERNET DELIVERY ONLY. There are NO print materials for this course. 2.
