RATIONALE

Honours level students currently undertaking communications, humanities and social sciences dissertations and research projects require knowledge of a range of techniques for researching and writing the dissertation. The student needs to be able to survey a field of literature, identify a research problem, decide on research objectives and select appropriate method/s to carry out the research. Students also need to ensure epistemological consistency between their aims, methodologies, data collection and analysis of results in a manner appropriate to their discipline areas.

SYNOPSIS

This course examines different methods of approaching a review of literature relevant to a research topic, culminating in the identification and refinement of research questions or hypotheses. It looks at how to select appropriate methods for answering the research question or testing hypotheses. Finally it discusses different approaches to presenting research data.

OBJECTIVES

On successful completion of this course students will be able to:

1. define their chosen dissertation topic
2. present a thorough review of existing literature related to their chosen dissertation topic
3. present and defend a methodology of research appropriate to their chosen dissertation topic
4. evaluate the epistemological consistency of their proposed methodology, data collection and analysis of results with their research aims

5. provide a substantial outline of their proposed dissertation, including timelines
6. demonstrate an understanding of the use of a range of electronic databases and/or a range of primary sources
7. demonstrate an understanding of appropriate use of informed consent and ethical clearance documentation
8. critique existing research reports from a range of critical perspectives
9. demonstrate an understanding of how academic dissertations are presented
