RATIONALE

An understanding of the principles of taxation is one of the most important and useful tools for anyone seeking advancement to senior management status in the corporate world, to those providing accounting or financial services to business and to those seeking to be professional accountants or lawyers. It is also equally important for individuals in managing their personal affairs. There would be no major business decision in Australia, from the purchase of an item of plant to the overall organisation of a business structure, which is taken without regard to the taxation implications. Indeed, tax is often the motivating factor behind a decision or action. A study of taxation law involves not only an attainment of knowledge of the provisions of the various Tax Acts, but also a large volume of case law which has defined and/or clarified both the acts or general concepts not defined in the Acts, as well as the ability to apply this knowledge to factual situations.

SYNOPSIS

In order to participate in the planning of a client's tax affairs it is necessary to understand the relevant sections of the appropriate taxation laws applicable to the transaction or entity structure. This course primarily introduces students to the Income Tax Assessment Act (ITAA) and the Goods and Services Tax Act 1999 (GSTA). Topics covered include assessable income, residency, capital gains tax, allowable deductions, classes of taxpayers, calculation of tax payable and

offsets/rebates of tax, tax administration provisions and the taxation of business entities. Goods and Services Tax is also covered in detail.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item/s that may be used to assess student achievement of an objective is/are shown in parentheses after each objective. On successful completion of this course, students should be able to:

1. explain the general operation of the Income Tax Assessment Act and the basic concepts underlying its operation (CMA Test 1, CMA Test 2, CMA Test 3, Assignment, Examination)
2. undertake an analysis of the income tax laws and apply the principles of taxation law to factual situations (CMA Test 1, CMA Test 2, CMA Test 3, Assignment, Examination)
