RATIONALE

To be able to teach languages, instructors need to be aware of what language is, how it can be described in terms of phonology, semantics and syntax, and how the meaning potential of language is realised in actual usage. Teachers also need to be aware of some recent theories of language as well as an understanding that language operates in a social domain that determines how it is used and how it positions the users.

SYNOPSIS

Students will be introduced to what language is, how it can be described in terms of phonology, semantics and syntax, and how the meaning is realised in actual usage. They will be also introduced to some recent theories of language as well as how language operates in a social domain.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. At the end of the course students will show an understanding of:

1. the relationships between language, society and culture by describing how language varieties and language use are intertwined with social and cultural factors (Assignment 1);

2. the complex interrelations between phonology, semantics, syntax and pragmatics in the production of meaning by discussing these relationships and giving concrete examples of them (Take Home Test);
3. systemic linguistics and other theories of language (Take Home Test);
4. demonstrate competence in scholarly writing including correct spelling, grammar, punctuation and bibliographic referencing. (Assignment 1 and Take Home Test)
