OTHER REQUISITES

State law in Queensland (Australia) requires that all adults working/undertaking professional experience/researching with children under the age of 18, in the state of Queensland are required to possess a current suitability card (Blue Card). (See "Other Requirements" for further information.) Also see: <http://www.childcomm.qld.gov.au/employment/bluecard/informationSheets.html>.

RATIONALE

Teachers constantly have to make judgements about the language proficiency levels of their students. With the present emphasis on the goals of second language teaching being more communicative and the need for students to meet literacy benchmarks, teachers have to develop the skills beyond pen and paper tests to include assessment of skills in oral and aural language. The present emphasis on outcomes-based education and national testing also emphasises the need for teachers to be able to discuss issues related to assessment practices, construct and use tests and other forms of assessment to measure their students' language and literacy skills. This course examines the current knowledge about language testing and assessment.

SYNOPSIS

The course will introduce students to the different types of language tests and forms of language assessment techniques and their purposes. It will look at how language proficiency is measured and the ways scores are interpreted. It will also discuss the criteria for good tests: reliability and validity. Students will have practice in devising their own test packages in which they will demonstrate their understanding of the principles of second language testing.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On successful completion of this course students will be able to:

1. discuss different types of language tests and their purposes;
2. describe different types of scales that are used in measurement;
3. demonstrate their knowledge in scoring and interpreting test data;
4. discuss the importance of reliability and validity in testing;
5. demonstrate their understanding of test construction by developing tests of language proficiency.
