### SYNOPSIS

As students draw closer to meeting the full requirements for graduating from the program, it is absolutely essential that they have the opportunity to integrate and synthesise the knowledge and competencies developed to date in relation to their professional and managerial responsibilities. This course allows students to identify and articulate the strategic issues that organisations are confronting. Students will be able to draw upon some of the critical concepts, techniques and information from other courses studied in order to develop informative and comprehensive responses to some of the key questions encountered in the strategic management of an organisation. This course provides a framework for analysis and integration by focusing attention on the development of an organisation's strategic directions, strategic capabilities and internal and external dynamics.

### OBJECTIVES

On completion of this course students will be able to:

1. provide evidence of insight into strategy development processes and of their ability to engage in strategic planning in different organisational contexts and in the context of organisational learning (Assignment 1, Assignment 2)

2. analyse, articulate and evaluate an organisation's strategic position within its 'business' environment, which includes its competitive position, the factors underpinning its strategic capability and its organisational purposes (Assignment 1, Assignment 2)
3. analyse, critically reflect upon, develop and present appropriate options and rationales for strategic choices at both corporate and business levels, and also some of the more detailed choices of both strategic direction and method (Assignment 1, Assignment 2)
4. analyse, critically reflect upon, develop and articulate various substantiated options relating to 'making strategy work' through developing the strategic capabilities of organisations (Assignment 1, Assignment 2).
