RATIONALE

It is essential that artistic development is guided by an understanding that creativity requires space and nurturing. Teachers have the responsibility to assume an active role in creating the space for learning, becoming active and reflective practitioners who analyse their own approaches to making meaning and self-expression through the arts, and understanding the impact of teacher behaviour and teaching environments upon children's cognitive and creative development. Teachers need a range of strategies and pedagogical approaches to foster creative thinking and artistic development in the middle-years learner. As stated in the Arts - years 1 to 10 syllabus, complex thinking, active investigation and deep understanding are essential tools for lifelong learning and are integral to arts education.

SYNOPSIS

This course encourages individual and co-operative development of basic skills for teaching in each of the arts syllabus strands, focusing on how creativity is fostered and developed through constructivist teaching approaches and authentic assessment. Students will have the opportunity to engage in experiences to develop personal expression, aesthetic judgement and critical awareness thus enabling them to become more responsive to children's creative needs. At all times during the course the teaching environment and safety aspects will be considered. Students in this course will participate in an associated professional experience of fifteen (15) days during which they will be encouraged to apply their learning from the course and from which they should be able to

bring fresh insights to the course work. Information communication technologies will be embedded throughout this course.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:
