## RATIONALE

Tertiary teaching is a highly complex, problematic, and context-specific activity. The difference between the contexts is vitally important. It requires a personally meaningful professional knowledge base for teaching and cognitive skills for effective teaching. Effective educators at all levels question, criticise and reformulate their assumptions about teaching and learning. However, this is only possible if one takes time to understand and appreciate the nature of these complex activities. The challenge for tertiary teachers is to develop an inclination and capacity to engage in the sort of intellectual dialogue and action for effective teaching. This knowledge base is dynamic and incomplete and is constantly being constructed and reconstructed. It develops via integration of a range of learning including knowledge about self, the context, and subject matter knowledge. The components of the professional knowledge base of teaching include content knowledge, knowledge of teaching and learning, curriculum knowledge, knowledge of learners and their characteristics, knowledge of educational contexts, and knowledge of educational ends, purposes, and values, and their philosophical and historical grounds. Tertiary educators with an understanding and appreciation of the complexities of teaching and learning in tertiary contexts, and who take responsibility for their own professional development, establish a solid foundation for enhancing their capacities in teaching and learning.

## SYNOPSIS

This course enables tertiary educators to explore teaching and learning in tertiary environments. In doing so, they will focus on their own context and anticipated teaching roles. Through the process of critical self-analysis with reference to the qualities of effective tertiary educators, participants will produce a 'teaching capacity enhancement plan' (TCEP). This plan should be developed in collaboration with professional colleagues who are prepared to work alongside you as members of a focused professional learning community. A key outcome of this course will be the 'teaching capacity enhancement plan'. This plan will allow you to incorporate relevant professional development and staff development activities, including work-based projects. The TCEP developed in this course will be evaluated in the final course (FET5302) of the Graduate Certificate in Tertiary Teaching and Learning. NOTE: Learners undertaking this course are required to have access to teaching and learning environments in a tertiary education setting.

## OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:

1. demonstrate knowledge and understanding of relevant teaching and learning theories; (Assignment 1 & Teaching Capacity Enhancement Plan)
2. demonstrate knowledge and understanding of the nature of tertiary teaching and learning; (Assignment 1)
3. demonstrate a comprehensive understanding of essential characteristics of highly successful tertiary educators and their impact on student learning; (Assignment 1)
4. demonstrate a comprehensive understanding of essential characteristics of highly effective learning environments and their impact on student learning; (Assignment 1 & Teaching Capacity Enhancement Plan)
5. demonstrate how an understanding of learners impacts on design, delivery and assessment in tertiary environments; (Assignment 1)
6. be responsive to context through adaptation of teaching and learning approaches to maximise learning according to context; (Teaching Capacity Enhancement Plan)
7. develop and justify a 'teaching capacity enhancement plan' appropriate to own needs. (Teaching Capacity Enhancement Plan)
8. demonstrate competence in written language and scholarly writing including correct spelling, grammar, and bibliographic referencing. (Assignment 1 and Teaching Capacity Enhancement Plan)
