SYNOPSIS

Social Science research projects require variously a range of methods, both qualitative and quantitative. The researcher needs to be able to identify a research problem, decide on research objectives and select appropriate method/s to carry out the research. These methods include focus groups, content analysis, in-depth interview and survey methods.

1. identify and critically analyse a variety of research methods currently employed by researchers in relevant fields of interest;
2. evaluate qualitative and quantitative research data, in the context of declared methodological frameworks
