REQUISITES

Co-requisite: EDU1010

OTHER REQUISITES

It is recommended that students have completed EDS2401. Students must have successfully completed the entire previous year's professional experience courses in order to enrol in this course. Students must be available for a prescribed period of time to undertake a placement in a school or other approved site as required in this course. State law in Queensland (Australia) requires that all adults working/undertaking professional experience/researching with children under the age of 18, in the state of Queensland are required to possess a current suitability card (Blue Card). (See "Other Requirements" for further information.) Also see: <http://www.childcomm.qld.gov.au/employment/bluecard/informationSheets.html>. Students can expect that questions in assessment items in this course may draw upon knowledge and skills that they can reasonably be expected to have acquired before enrolling in the course. This includes knowledge contained in pre-requisite courses and appropriate communication, information literacy, analytical, critical thinking, problem solving or numeracy skills. Students who do not possess such knowledge and skills should not expect to achieve the same grades as those students who do possess them.

RATIONALE

Teachers are grappling with significant changes in educational initiatives, curriculum, societal expectations and the concept of teaching in the 21st Century. What does it mean to teach in a world of multiliteracies where lifelong learning is promoted more highly than the traditional content; where the knowledge of information is surpassed by the process of locating and synthesizing information for a purpose; where ICTs pervade, and where the traditional 3Rs sit beside by the 3Ts (thinking, teamwork and technology). Adolescent learners demand an integrated curriculum which is relevant and learning activities that will enable them to gain skills which can be used

beyond their schooling. This course provides beginning educators opportunities to continue to build their own personal pedagogical practice, to redefine these in light of their professional experiences, and provides familiarity with the literature and practice in effective teaching and learning. Students will investigate what it means to be an educator in the 21st century, examine current curriculum, assessment and pedagogy in an integrated context.

SYNOPSIS

This course seeks to provide learning opportunities (both on-campus and in professional experience) that will require pre-service teachers to play an active role in the construction of their own pedagogical practice and the development of professional expertise in planning and delivering effective teaching and learning. Effective teachers question, criticise and reformulate their assumptions about the nature of their work. Reflective practice promotes continued analysis, critique and interpretation of curriculum and pedagogical initiatives that impact on the work of educators. Through a range of on-campus and professional experience-related activities, the course aims to provide opportunities for students to develop their general pedagogical knowledge, curriculum knowledge and pedagogical content knowledge. Students undertaking this course are required to complete a 20 day professional experience placement in an approved educational setting.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:

1. plan, implement and review learning experiences that incorporate a variety of teaching, and behaviour management strategies which meet the needs of students and the educational context (Professional Experience, Analysis of Teaching Event)
2. demonstrate knowledge, understanding and implementation of classroom observation and reflect critically on their teaching practices (Professional Experience, Analysis of Teaching Plan)
3. identify, present and utilize a range of models and strategies of effective teaching in secondary classrooms (All assessment items)
4. design and develop cross curricular unit planning, lesson planning and presentation with peers (Group presentation, Unit plan)
5. demonstrate knowledge and understanding of the purposes, techniques and principles of student assessment (Unit plan, Professional Experience)
6. demonstrate the ability to integrate ICT into curriculum planning (Unit plan)
7. demonstrate effective team skills through contributing to a professional team for collaboration, communication, and presentation. (Group presentation, Unit plan)
8. review critically their personal language and literacy skills (all assessment items)
9. demonstrate competence in and appropriate use of language and literacy, including spelling, grammar, punctuation and bibliographic referencing. (All assessment items)
