RATIONALE

There are many potential areas of study and workplace professional activity which offer significant opportunities for learning appropriate to postgraduate education studies, but are not currently available in prepared formal courses. In recognition of this situation, this course is intended to enable students to undertake guided individual study of such an area or to gain credit recognition in their formal program of study, for appropriate demonstrated professional activity learning.

SYNOPSIS

This course is designed as a supervised independent study. This means that students working with a member of the academic staff are able to negotiate a course of study appropriate to their particular learning needs and interests. This course will operate on the basis of frequent individual consultation and feedback between the student and the staff member nominated as the study supervisor. Before enrolling in the course, students are advised to discuss the nature, processes and anticipated outcomes of the proposed study topic or activity with a Faculty member, who might act as their study supervisor. NOTE: Minimum enrolment numbers apply to this offering. Should enrolments not reach the minimum number required for on-campus study, students may be transferred to the EXT or WEB offering and advised of this change before semester commences.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:

1. demonstrate the ability to locate, access, summarise and critically evaluate established theories and other creditable information relevant to specialised topic, issue or workplace challenge. (Final Report)
2. demonstrate the ability to interpret and synthesise such theories and information and / or reflect on their application to professional practices. (Final Report)
3. demonstrate an ability to communicate their interpretation and reflection in a form suitable for dissemination to their professional peers. (Final Report)
4. demonstrate competence in written language and scholarly writing including correct spelling, grammar, and bibliographic referencing. (Final Report)
