RATIONALE

Children with Autism Spectrum Disorder (ASD) view the world from a different perspective to all other children. The combined difficulties in areas of communication, socialization and behaviour can make the world a threatening and confusing place for a child with autism. It is important that teachers understand the complexities of ASD in general and the specific strengths, interests and abilities of each child with ASD so that modifications to learning and school life are appropriate and effective.

SYNOPSIS

SPE3002 introduces the beginning teacher to the world of a child with Autism Spectrum Disorder. Students will interrogate the triad of difficulties experienced by children with ASD, in particular communication, socialization and behaviour difficulties. They will research aspects of ASD and Asperger syndrome to understand the complex nature of the disorders. Teaching and learning strategies to maximise learning outcomes for students with ASD will be integral to each part of the course. Understanding the component difficulties experienced by students with ASD will also inform the processes and skills required to manage behaviours in the classroom setting. NOTE: Minimum enrolment numbers apply to this offering. Should enrolments not reach the minimum number required for on-campus study, students may be transferred to the EXT or WEB offering and advised of this change before semester commences.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:

1. identify and describe the components of the triad of difficulties experienced by students with ASD. (Peer Mediation and Quizzes)

2. articulate the diverse nature of students with ASD including those students with Asperger syndrome. (Peer Mediation and Quizzes)
3. identify a range of teaching strategies that address learning difficulties in the areas of communication and socialization. (Peer Mediation and Quizzes)
4. demonstrate knowledge, understanding and skills in information literacy skills, including critical and reflective thinking (Peer Mediation and Quizzes)
5. demonstrate competence in and appropriate use of language and literacy, including spelling, grammar, punctuation and bibliographic referencing. (Peer Mediation and Quizzes)
