RATIONALE

Rapid changes in secondary schools and the growing diversity of contexts place intense demands on the role of teachers. This course provides further professional (field) experience in a new context. The student will have further opportunity for bringing together both theory and practical components of the program. The integration of the theory with the active daily tasks associated with a teaching career is an essential step in the transition from tertiary institution to the professional work place.

SYNOPSIS

The in-school experience to date has enabled students to be involved in the normal day to day running of a school in one context. This course offers the student an extensive period in the field in a new context. The professional experience will require involvement in the planning and implementation of courses of work along with the daily administrative and professional requirements of a teacher. The experience will require pre-service teachers to play an active role in the construction of their own practical theories. Their in-school experience will enable them to question, criticize and reformulate their assumptions about the nature of teachers' work.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:

1. to provide professional experience in a variety of contexts (Professional Experience)
2. to develop students ability to analyse their own practice for improvement (Professional Experience and Reflective Action)
3. to develop students ability to observe research, analyse and reflect on their own and others' practice in a collaborative manner (Reflective Action)
4. to develop a student ability to contextualise practice (Professional Experience, Reflective Action and Equity Issue)
5. to make the student aware of professional development and trends affecting both the teaching profession and their own specialist teaching areas (Reflective Action and Equity Issue)
6. to make the student aware of, and analyse equity issues which impinge upon the teaching-learning process, teaching practice and the contexts of schooling (Equity Issue)
7. to demonstrate understanding and application of appropriate professional communication skills (Reflective Action).
8. Demonstrate competence in written language and scholarly writing including correct spelling, grammar, and bibliographic referencing. (All assessment items)
