

## Current practice

The current practices section will seek to present papers that are both observant and critical of current practice issues in the field of Instructional Technology worldwide.

This will cover a range from currently active projects, research and development projects, top individual efforts from a currently active point of function.

Our papers this issue are:

**Andrew Biro**

[“Simulating a Mass Election in the Classroom”](#)

**Ann M. Shortridge, Toby De Loght & Benay Dara-Abrams**

[TNT- IDS: Showcasing an Educational Informatics Project Development Guide Prototype](#)

**Birgit Loch & Diane Donovan**

[Progressive Teaching of Mathematics with Tablet Technology](#)

If you wish to supply a paper for inclusion in this section please read the [guidelines for contributors](#) and email your submission to the [editor](#).
