

## Online resources for students plan

The overall aim of this plan is to develop a single reinvigorated repository of academic skills resources for students.

### Goals

- To provide a single integrated repository of academic skills online resources for students.
  - Map nature and location (audit) of online academic skills resources for students.
  - Restructure architecture of web resources in collaboration with USQ web restructure and implementation of new CMS:
    - include linkages with USQAssist-like systems; and
    - include strong linkages to proposed virtual learning centre.
  - Implement a quality assurance process for development, provision and maintenance of online resources for academic skills.
- To re-invigorate current ALS resources, especially those for international students.
- To develop online resources using the new technologies that can be used flexibly by diverse students.
- Assist faculties to develop and/or revise communication and referencing handbooks for online delivery.
- To provide generic resources for staff to incorporate into courses as required.
