With the exception of the SIMS Workshops all other activities will be held in
The Learning Centre, R Block, Level 3 at the Toowoomba Campus.

DESCRIPTION OF SUPPORT ACTIVITIES

SIMS full day workshops will cover the basic mathematics in the first module of STA2300 and also in the readiness test.

Calculator workshops - learn how to use the statistics mode on your calculator.

Meet-up - workshops run by a student leader who has successfully completed the course. The workshops focus on study skills and course content. Workshop activities provide help with studying for assignment and exam questions.

Algebra refresher - catch up on some of those basic algebra skills.

Graphing refresher - types of graphs, scatterplots and the straight line.

Probability refresher - basic rules of probability.

Residential workshops - for external students.

Study group - informal gathering, bring along questions and discuss these with other students
