14	3/6/09	Study group	4.30-6pm
15	10/6/09	Meet-up (exam revision activities)	4.30-6pm
16/17		Exam period	

DESCRIPTION OF SUPPORT ACTIVITIES

SIMS full day workshops will cover the basic mathematics in the first module of STA2300 and also in the readiness test.

Calculator workshops - learn how to use the statistics mode on your calculator.

Meet-up - workshops run by a student leader who has successfully completed the course. The workshops focus on study skills and course content. Workshop activities provide help with studying for assignment and exam questions.

Algebra refresher - catch up on some of those basic algebra skills.

Graphing refresher - types of graphs, scatterplots and the straight line.

Probability refresher - basic rules of probability.

Residential workshops - for external students.

Study group - informal gathering, bring along questions and discuss these with other students.

HELP AVAILABLE AT THE LEARNING CENTRE

The Learning Centre offers free academic language and maths support to all students. This support is available either one-to-one, by phone or via email with qualified staff. To make a booking online go to

<http://www.usq.edu.au/learningcentre/default.htm>

phone 4631 2751 or email tlc@usq.edu.au.
