1.3.1 UNIVERSITY ACTIVITY STRUCTURE for Use in Planning and Reporting

The University Activity Structure was developed for use in planning, quality and review at USQ. It is based on a categorisation of institutional activities and outcomes and is not constrained by other organisational or line management structures. Hence, it provides a consistent basis for planning, evaluation and review across the University over a long period; enabling long-term trends to be readily identified and recorded.

A list of accompanying measures, performance indicators and key performance indicators has been developed.

The Vice-Chancellor approved the following activity structure following discussion at the Vice-Chancellor's Committee meeting of 25 February 2005.
