

## Grant Application Process (6 October 2011)

**\*\* This process applies to ALL GRANTS (including EOI) \*\***

### Why should this process be followed?

- This process is aimed at supporting the competitiveness of USQ sourced applications.
- To serve as a quality assurance to enhance and potentially increase the number of successful grant submissions.
- The Research Office forwards periodic reports to the DVC(S) on researcher activity (based on grants submissions and the outcomes - successful or unsuccessful). The DVC(S) can assume a researcher has been inactive if their name is not on the report.
- The Government provides USQ with a financial reward for our research activity. If grant submissions are not reported to the ORHD they are unable to claim them.
- Opportunity to receive constructive feedback from Centre Director and DVC(S).
- Tracking grant submissions impacts ACSBD funding and performance indicators.
