

# KeepCup

## Why the KeepCup?

Designed and manufactured in Australia the KeepCup is made from recyclable plastic. The KeepCup brand of re-usable coffee cups consumes less energy to produce compared to a ceramic mug, are lightweight, unbreakable and easy to carry.

- The standard medium size cup (340ml) is barrista designed and made to measure shots and small size coffees.
- It is made for #5 Polypropylene (the safe grade food plastic).
- The cup itself is recyclable at the end of its life (estimated around 4-5 years) Simply remove the silicon plug and band and dispose of the cup in your regular yellow recycling bin.
- Sealable and lightweight.
- No grooves or twist tops so it's easy to clean.
- Dishwasher safe.
- Microwave safe (don't microwave it with the lid on).
- Fits easily into car cup holders.
- The plug rotates 90 degrees to open and close the sipper hole completely for safety.
