OTHER-REQUISITES
Pre-requisite: Unless special circumstances have been approved by the Director of Post Graduate Studies, the student must have successfully completed a minimum of six courses of study before enrolling in this course.

SYNOPSIS
As students draw closer to meeting the full requirements for graduating from the course, it is absolutely essential that they have the opportunity to integrate and synthesise the knowledge and competencies developed to date in relation to their professional and managerial responsibilities. This course allows students to identify and articulate the strategic issues that organisations are faced with. Students will be able to draw upon some of the critical concepts, techniques and information from other courses studied in order to develop informative and comprehensive responses to some of the key questions encountered in the strategic management of an organisation. This course provides a framework for analysis and integration by focusing attention on the development of an organisation's strategic directions, strategic capabilities and internal and external dynamics.

OBJECTIVES
Completion of this course will enable students to:

- Apply the processes of business strategy development, evaluation and selection to an organisation.
- Develop a framework for implementation of a strategy/strategic plan.
- Make a contribution to the field of strategic management in the form of a paper of publication standard.
