RATIONALE
In addition to the acquisition of theoretical and executant musical skills, the professional musician must be able to demonstrate the ability to apply this knowledge in a logical and musicianly way. Music Project courses are designed to provide a vehicle for the exercising of these skills and, at the same time, add to the general background necessary for entry into the chosen area of vocational specialisation.

SYNOPSIS
Students in this course will choose a vocationally oriented project from a range which may include additional performance activity, music administration, music research, ensemble direction, the learning of a second instrument and music teaching.

OBJECTIVES
On successful completion of this course students will have achieved either:

- a greater depth of musical performing experience by participation in activities such as accompanying, Chamber Music or Repetiteur work; OR
- a practical acquaintance with activities closely related to music performance such as Music Librarianship, Concert Promotion, Publicity, Front-of-House Management, and elements of Stage Production; OR
- a deeper understanding of a chosen aspect of music by completing a written project on a topic approved by the Course Examiner; OR
- practical experience in Ensemble, specifically from the conducting point of view and involving areas such as elements of conducting technique, rehearsal techniques,
programme building techniques, and the selection, preparation and presentation of a short programme for an appropriate instrumental or vocal group; OR
• performing expertise on a second instrument; OR
• development of other appropriate vocationally oriented skills as approved by the Course Examiner.
