Moderator: Brad Carter

RATIONALE
A knowledge of the concepts of physics is fundamental to the understanding of the mechanisms used widely in modern science and technology. This course provides the necessary physics for future professionals, for example, scientists, engineers, doctors and teachers.

SYNOPSIS
Physics is a fundamental science and is concerned with the basic principles of science and technology. This introductory course provides students with an understanding of basic physics principles. Applications of physics are provided along with the problem solving and practical exercises. It is intended for students wishing to study for professional careers. This course has a compulsory one day residential school.

OBJECTIVES
On successful completion of this course students will be able to:

- demonstrate a basic knowledge of physics principles with emphasis on measurement, vectors, kinematics, forces, work, energy, momentum, rotational mechanics, simple harmonic motion, waves, thermodynamics, electric and magnetic fields, electric circuits and geometric optics.
- Demonstrate skills and knowledge required to perform laboratory experiments safely with appropriate equipment.

TEXT and MATERIALS required to be PURCHASED or ACCESSED:

Books can be ordered by fax or telephone. For costs and further details use the 'Book Search' facility at http://bookshop.usq.edu.au by entering the author or title of the text.

*College Physics*, 5th edn (Technology version) kit consisting of:

*65100 Foundation Physics Introductory/Study Book*, USQ.

*65100 Foundation Physics Laboratory Manual*,
Interactive Physics Software, CD-ROM - 1 disc.

Workbook to accompany the *Saunders Core Concepts in College Physics*, CD-ROM.

NOTES:
3. Examiner to advise due dates for the Laboratory Reports
4. Examination dates will be available during the Semester. Please refer to the
    examination timetable when published.

OTHER REQUIREMENTS
1 Attendance Requirements It is the students' responsibility to actively participate
   in all classes scheduled for them, and to study all material provided to them or
   required to be accessed by them to maximise their chance of meeting the objectives
   of the course and to be informed of course-related activities and administration.
2 Requirements to Satisfactorily Complete Each Assessment Item To ensure that
   students can satisfy the objectives of the practical component of the course, students
   must attend at least 80% of the practical classes, including submission of the
   assessment items and obtain at least half of the marks available for each item
   submitted. To satisfactorily complete the examinations in the course, students must
   obtain at least half of the marks available for each examination.
3 Minimum Requirements to Pass the Course To be assured of a pass in this unit,
   students must: obtain an overall mark of at least 50%; obtain at least 50% of the
   marks available in the examination(s); obtain an overall mark of at least 50% in
   the other assessments.
4 Grading Final grades for students will be determined by the addition of the marks
   obtained in each assessment item, weighted as in the Assessment Details and by
   considering the students' level of achievement of the objectives of the course.
5 Supplementary and Deferred Examinations Students who obtain an overall passing
   mark, but who do not perform satisfactorily in an examination, may, at the discretion
   of the examiner, be granted a supplementary examination. Students will be granted
   a deferred examination only if they perform satisfactorily in all other assessment
   items. Any supplementary or deferred examinations for this course will be held
   during the examination period at the end of the semester of the next offering of
   this course.
6 Assignments The due date for assignments is the date by which a student must
   despatch an assignment to the USQ. The onus is on the students to provide proof
   of the despatch date, if requested by the Examiner. Students must retain a copy of
   each item submitted for assessment. This must be produced within 48 hours if
   required by the Examiner. In accordance with University's Policy on Assignments
   (Regulation 5.6.1), the Examiner of a course may grant an extension of the due
   date of an assignment in extenuating circumstances. This policy may be found in
   the USQ Handbook, the Distance Education Study Guide and the Faculty of
   Sciences' Orientation Handbook for new on-campus students. All students are
   advised to study and follow the guidelines associated with this policy. An
   assignment submitted after the due date without an extension approved by the
   Examiner, will attract a penalty of 20 percent of the assigned mark for each day
   (or part thereof) that the assignment is late.
7 Examinations Candidates should be aware that the University has policies and
   regulations (Regulation 5.6.2.2.) about the use of unfair means and electronic
   devices in an examination and they should refer to them to determine whether or
not actions they intend to take are acceptable to the University. Restricted Examination: Candidates will be allowed access only to specific materials in a restricted examination. The only materials that students may use in the restricted examination for this course are: (a) writing materials (non-electronic and free from materials which could give the student an unfair advantage in the examination. (b) calculators which cannot hold textual information (students must indicate on their examination paper the make and model of any calculator(s) they use during the examination). With the approval of the Examiner, candidates may take an appropriate non-electronic translation dictionary into the examination. This will be subject to perusal and may be removed from the candidate's possession until appropriate disciplinary action is completed if found to contain material that could give the candidate an unfair advantage. A list of the materials candidates may access in the restricted examination will be on the frontispiece of the examination paper.
