The University of Southern Queensland
Course Specification

Description: Introductory Microbiology

Subject Cat-Nbr Class Term Mode Units Campus
BIO 2205 24356 2, 2003 ONC 1.00 TWMBA

Academic Group: FOSCI
Academic Org: FOS002
HECS Band: 2
ASCED Code: 010911

STAFFING
Examiner: TK Mukkur
Moderator: Michael Kotiw

PRE-REQUISITES
Pre-requisite: BIO1101 and BIO2201

RATIONALE
Microbiological considerations are important in most areas of biology including medical sciences, animal, plant and microbial biotechnologies and general plant and environmental sciences. It is thus important that professionals in any of these fields become aware of the potential involvement of micro-organisms in their fields of study and become sufficiently familiar with the subject to gain an appreciation of the role played by micro-organisms in our daily lives and the environment.

SYNOPSIS
This introductory study in microbiology is aimed at providing knowledge to professionals on the relevance of this subject to different fields of biology and the impact it can have on improving our daily lives and the environment. Explored in this course are the history and diversity of micro-organisms, cell structure and function, metabolism and growth, genetics of microbes and its relevance to different areas of biomedical, rural and environmental biotechnology, factors affecting the interactions of micro-organisms including bacteria, viruses, fungi and protists with plants, animals and humans and their impact on environmental microbiology including land use or public health, benefit or industrial microbiology, and the way the human or animal body defends itself against attack by foreign invaders.

OBJECTIVES
On successful completion of this course students will be able to:
• show sufficient familiarity with the history of the study of microbiology to explain past misconceptions and current conventional wisdom;
• make meaningful comments about each of the microbiological terms encountered during the course;
• demonstrate a useful knowledge of the taxonomy and morphological features of the various organisms normally regarded as microorganisms - viruses, bacteria, fungi and protozoa;
• illustrate the structure, reproductive processes, pathogenicity and genetics of bacteria and viruses;
• show an understanding of the various metabolic processes found in bacteria and the role of these in ecological, biotechnological and pathogenic functions;
• describe the unique features of the genetics of bacteria and appreciate benefits of recombinant DNA technology;
• demonstrate appreciation of the ecological role played by the microorganisms in soil and the atmosphere;
• describe the microbiology of foods and the industrial applications of microbiology;
• demonstrate appreciation of the contributions of microbes to genetic engineering and biotechnology including bioremediation;
• explain the basic principles of immunology as applied to human or animal health;
• demonstrate sufficient manipulative competence to be judged safe and efficient in common laboratory procedures;
• demonstrate skills and knowledge required to perform laboratory experiments safely with appropriate equipment.

TEXT and MATERIALS required to be PURCHASED or ACCESSED:

Books can be ordered by fax or telephone. For costs and further details use the 'Book Search' facility at http://bookshop.usq.edu.au by entering the author or title of the text.

REFERENCE MATERIALS

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

NOTES:
1. Lecturer to advise date for mid term test early in the Semester
2. Lecturer to advise the date for prac exam early in the Semester.
3. Examination dates will be available during the Semester. Please refer to the examination timetable when published.

IMPORTANT ASSESSMENT INFORMATION

1. Attendance requirements:
   It is the students' responsibility to attend and participate appropriately in all activities (such as lectures, tutorials, laboratories and practical work) scheduled for them, and to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.

2. Requirements for students to complete each assessment item satisfactorily:
   To complete each of the assignments satisfactorily, students must obtain at least 50% of the marks available for the test. To complete the examination satisfactorily, students must obtain at least 50% of the marks available for the examination. To complete the practical component satisfactorily, students must obtain at least 50% of the marks available in the practical test.

3. Penalties for late submission of required work:
If students submit assignments after the due date without prior approval then a penalty of 20% of the total marks available for the assignment will apply for each working day late.

4 Requirements for student to be awarded a passing grade in the course:
To be assured of a passing grade, students must demonstrate, via the summative assessment items, that they have achieved the required minimum standards in relation to the objectives of the course by satisfactorily completing all summative assessment items (the examination and tests).

5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the weighted aggregate of the marks obtained for each of the summative assessment items in the course.

6 Examination information:
In an Open Examination, candidates may have access to any material during the examination except the following: electronic communication devices, bulky materials, devices requiring mains power and material likely to disturb other students.
In a Closed Examination, candidates are allowed to bring only writing and drawing instruments into the examination.

7 Examination period when Deferred/Supplementary examinations will be held:
Any Deferred or Supplementary examinations for this course will be held in the fourth week of the semester 1 of the following year and the examiner will advise students involved in writing of the date time and location of any such examination.

8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL http://www.usq.edu.au/SECARIAT/calendar/Part5/ or in the printed version of the current USQ Handbook.

ASSESSMENT NOTES

9 In order to attend laboratory classes, students must provide and wear appropriate personal protective equipment. This shall include a laboratory coat, closed in shoes, and safety glasses. Such equipment must be approved by supervising staff. Failure to provide and wear the appropriate safety equipment will result in students being excluded from classes.

10 Students who, for medical, family/personal, or employment-related reasons, are unable to complete an assignment or to sit for an examination at the scheduled time may apply to defer an assessment in a course. Such a request must be accompanied by appropriate supporting documentation. One of the following temporary grades may be awarded IDS (Incomplete-Deferred Examination); IDM (Incomplete Deferred Make-up); IDB (Incomplete - Both Deferred Examination and Deferred Make-up).

11 In accordance with University's Assignment Extension Policy (Regulation 5.6.1), the examiner of a course may grant an extension of the due date of an assignment in extenuating circumstances. The Faculty will normally only accept assessments that have been written, typed or printed on paper-based media. The Faculty will NOT accept submission of assignments by facsimile. Students who do not have regular access to postal services or who are otherwise disadvantaged by these
regulations may be given special consideration. They should contact the examiner of the course to negotiate such special arrangements.
