ASCED Code: 030305

STAFFING

Examiner: Doug Baddeley
Moderator: Mick Morgan

RATIONALE

The aircraft industry makes great demands upon its materials. Not only must designs be efficient and as light as possible, but they must also ensure that failure in flight does not occur on account of the almost certain tragic consequences. To ensure reliable operation, the design must also include maintenance in the form of inspection and repairs due to corrosion or cracking due to metal fatigue. A knowledge of aircraft materials is of fundamental importance to those engaged in aircraft maintenance and modification.

SYNOPSIS

This course provides a broad outline of the characteristic properties and behaviour in service of the commonly used aircraft materials, with particular emphasis on airframe materials. This knowledge allows an understanding of the consequences of the use of incorrect material for component replacement and provides a basis for appreciating the inspection procedures used as part of the maintenance schedule. Some newer materials likely to find more widespread use in aircraft in the future are also briefly covered.

OBJECTIVES

On completion of this course, students should be able to:

- understand the characteristic properties, behaviour in service and typical applications of commonly used aircraft materials;
- describe the common mechanical test procedures used to assess the performance of materials used in aircraft construction;
- apply technical and conceptual skills in the application of mechanical test results to aircraft materials;
• describe the various non destructive testing techniques and the application of such techniques in aircraft maintenance.

TEXT and MATERIALS required to be PURCHASED or ACCESSED:

Books can be ordered by fax or telephone. For costs and further details use the 'Book Search' facility at http://bookshop.usq.edu.au by entering the author or title of the text.

MEC1201 Engineering Materials External Study Package, USQ Publication,

A hand held battery operated calculator which does not have keys for the alphabet.

REFERENCE MATERIALS

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

Alexander, W. & Street, A. 1989, Metals in the Service of Man, 9th edition, Penguin,

Cuckson, I. M. *Manufacture of Bonded Composite Assemblies for Aircraft*, Ibidem, (pp 19-22)

**NOTES:**
- Student Administration will advise students of the dates of their examinations during the semester.

**IMPORTANT ASSESSMENT INFORMATION**

1 Attendance requirements:
   It is the students' responsibility to attend and participate appropriately in all activities (such as lectures, tutorials, laboratories and practical work) scheduled for them, and to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.

2 Requirements for students to complete each assessment item satisfactorily:
   To complete the practical component satisfactorily, students must submit, by the due date, a practical report which meets the requirements of the assessment scheme.

3 Penalties for late submission of required work:
   A CMA submitted after the due date will not be marked if the results and answers have been released.
4 Requirements for student to be awarded a passing grade in the course:
   To be assured of receiving a passing grade a student must submit all of the
   summative assessment items, achieve at least 40% in the examination and at least
   50% of the available weighted marks for the summative assessment items.

5 Method used to combine assessment results to attain final grade:
   The final grades for students will be assigned on the basis of the weighted aggregate
   of the marks (or grades) obtained for each of the summative assessment items in
   the course.

6 Examination information:
   In a Closed Examination, candidates are allowed to bring only writing and drawing
   instruments into the examination.

7 Examination period when Deferred/Supplementary examinations will be held:
   Any Deferred or Supplementary examinations for this course will be held during
   the examination period at the end of the semester of the next offering of this course.

8 University Regulations:
   Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10
   Academic Misconduct for further information and to avoid actions which might
   contravene University Regulations. These regulations can be found at the URL
   http://www.usq.edu.au/SECARIAT/calendar/Part5/ or in the printed version of the
   current USQ Handbook.

ASSESSMENT NOTES

1 In accordance with University's Assignment Extension Policy (Regulation 5.6.1),
   the examiner of a course may grant an extension of the due date of an assignment
   in extenuating circumstances.

2 The Faculty will normally only accept assessments that have been written, typed
   or printed on paper-based media.

3 The Faculty will NOT accept submission of assignments by facsimile.

4 Students who have undertaken all of the required assessments in a course but who
   have failed to meet some of the specified objectives of a course within the normally
   prescribed time may be awarded the temporary grade: IM (Incomplete - Make up).
   An IM grade will only be awarded when, in the opinion of the examiner, a student
   will be able to achieve the remaining objectives of the course after a period of
   non-directed personal study.

5 Students who, for medical, family/personal, or employment-related reasons, are
   unable to complete an assignment or to sit for an examination at the scheduled time
   may apply to defer an assessment in a course. Such a request must be accompanied
   by appropriate supporting documentation. One of the following temporary grades
   may be awarded IDS (Incomplete - Deferred Examination; IDM (Incomplete
   Deferred Make-up); IDB (Incomplete - Both Deferred Examination and Deferred
   Make-up).
