Examiner: Grant Daggard
Moderator: Michael Kotiw

REQUISITES
Pre-requisite: BIO2209 Co-requisite: BIO2205

RATIONALE
A revolution in biology has occurred as a result of recent advances in the field of molecular biology and genetic engineering. An appreciation of the potential applications of molecular biology is of growing importance in many areas of biological and medical research. This course serves to develop an understanding of many fundamental principles and current techniques in molecular biology. The potential impact of this technology on the nature of the world in which we live is also discussed.

SYNOPSIS
Biology is today in the midst of a revolution as a result of recent research into the molecular basis of life. An understanding of the theory and techniques of molecular biology are now becoming essential to many diverse areas of study in biology: from the study of biodiversity and evolutionary relationships to genetic engineering of microbes, plants and animals. This course is for students who have a background in cell biology. Drawing on this knowledge base, the course addresses the nature of gene organisation, replication and expression in both prokaryotic and eukaryotic systems. Practicals involve an introduction to techniques required for the isolation, study and manipulation of genes as well as an introduction to basic tools in bioinformatics. Potential applications of recombinant DNA in biotechnology and medicine are also discussed.
OBJECTIVES

On the successful completion of this course, the student will be able to:

1. demonstrate an understanding of the current concepts of DNA structure, maintenance and repair;
2. explain the processes involved in gene organisation, replication and expression in both prokaryotic and eukaryotic systems;
3. demonstrate an understanding of the tools used in recombinant DNA technology including: enzymes, host-vector systems and techniques for gene isolation, cloning and characterisation;
4. use of a range of molecular biological laboratory techniques;
5. comment on the applications of molecular biology and bioinformatics to recent advances in biology and medicine;
6. comment on the various debate positions presented by both critics of and advocates of the use of recombinant DNA technology;
7. demonstrate skills and knowledge required to perform laboratory experiments safely with appropriate equipment.

TEXT and MATERIALS required to be PURCHASED or ACCESSED:

ALL textbooks and materials are available for purchase from USQ BOOKSHOP (unless otherwise stated). Orders may be placed via secure internet, free fax 1800642453, phone 07 46312742 (within Australia), or mail. Overseas students should fax +61 7 46311743, or phone +61 7 46312742. For costs, further details, and internet ordering, use the 'Textbook Search' facility at http://bookshop.usq.edu.au click 'Semester', then enter your 'Course Code' (no spaces).

(student edition)
REFERENCE MATERIALS:

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

NOTES:

1. The examiner will advise students of due date for Problem Sets.
2. The examiner will advise students of due dates for practical reports.
3. Examination dates will be available during the Semester. Please refer to the examination timetable when published.

IMPORTANT ASSESSMENT INFORMATION

1. Attendance requirements:
   It is the students' responsibility to attend and participate appropriately in all activities (such as lectures, tutorials, laboratories and practical work) scheduled for them, and to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.

2. Requirements for students to complete each assessment item satisfactorily:
   To complete each of the assessment items satisfactorily, students must obtain at least 50% of the marks available for each assessment item.

3. Penalties for late submission of required work:
   If students submit assignments after the due date without prior approval then a penalty of 20% of the total marks gained by the student for the assignment will apply for each working day late.

4. Requirements for student to be awarded a passing grade in the course:
   To be assured of receiving a passing grade a student must submit all of the summative assessment items, achieve at least 50% in the examination and at least 50% of the available weighted marks for the summative assessment items.
5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the weighted aggregate
of the marks obtained for each of the summative assessment items in the course.

6 Examination information:
In a Restricted Examination, candidates are allowed access to specific materials
during the examination. The only materials that candidates may use in the restricted
examination for this course are: writing materials (non-electronic and free from
material which could give the student an unfair advantage in the examination);
calculators which cannot hold textual information (students must indicate on their
examination paper the make and model of any calculator(s) they use during the
examination. With the Examiner's approval, candidates may, take an appropriate
non-electronic translation dictionary (but not technical dictionaries) into the
examination. This will be subject to perusal and, if it is found to contain annotations
or markings that could give the candidate an unfair advantage, it may be removed
from the candidate's possession until the appropriate disciplinary action is
completed.

7 Examination period when Deferred/Supplementary examinations will be held:
Any Deferred or Supplementary examinations for this course will be held during
the next examination period.

8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10
Academic Misconduct for further information and to avoid actions which might
contravene University Regulations. These regulations can be found at the URL
http://www.usq.edu.au/corporateservices/calendar/part5.htm or in the current USQ
Handbook.

ASSESSMENT NOTES

9 In order to attend laboratory classes, students must provide and wear appropriate
personal protective equipment. This shall include a laboratory coat, closed in shoes,
and safety glasses. Such equipment must be approved by supervising staff. Failure
to provide and wear the appropriate safety equipment will result in students being
excluded from classes.

10 Students who have undertaken all of the required assessments in a course but who
have failed to meet some of the specified objectives of a course within the normally
prescribed time may be awarded the temporary grade: IM (Incomplete-Make-up).
An IM grade will only be awarded when, in the opinion of the examiner, a student
will be able to achieve the remaining objectives of the course after a period of non
directed personal study. Students who, for medical, family/personal, or
employment-related reasons, are unable to complete an assignment or to sit for an
examination at the scheduled time may apply to defer an assessment in a course.
Such a request must be accompanied by appropriate supporting documentation.
One of the following temporary grades may be awarded IDS (Incomplete-Deferred
Examination); IDM (Incomplete Deferred Make-up); IDB (Incomplete - Both
Deferred Examination and Deferred Make-up).

11 The due date for an assignment is the date by which a student must despatch the
assignment to the USQ. The onus is on the student to provide proof of the despatch
date, if requested by the Examiner. Students must retain a copy of each item submitted for assessment. If requested by the Examiner, students will be required to provide a copy of assignments submitted for assessment purposes. Such copies should be despatched to USQ within 24 hours of receipt of a request being made. The examiner of a course may grant an extension of the due date of an assignment in extenuating circumstances. The Faculty will normally only accept assessments that have been written, typed or printed on paper-based media. The Faculty will NOT accept submission of assignments by facsimile. Students who do not have regular access to postal services or who are otherwise disadvantaged by these regulations may be given special consideration. They should contact the examiner of the course to negotiate such special arrangements. In the event that a due date for an assignment falls on a local public holiday in their area, such as a Show holiday, the due date for the assignment will be the next day. Students are to note on the assignment cover the date of the public holiday for the Examiner's convenience.
