RATIONALE
Educators' knowledge of the development of multiple literacies from birth to eight years of age provides the framework for planning supportive language and literacy environments that facilitate the important transition from infancy through to the early years of school. Sound appreciation of the emergent nature of literacy offers pathways to learning which include negotiating multilingualism and supporting progress in students with diverse literacy development. Educators' awareness of the influence of socio-cultural contexts and the significance of continuity between the educational environments of the home and centre/school provides a focus for appreciating children's purposes in communicating and their search for meanings as they develop effective use of language and literacy.

SYNOPSIS
This course will explore how oral language and symbolic representation of infants, toddlers and preschoolers form the basis for the emergence of multiple literacies which eventually incorporate print. The idea of emerging literacies will be developed as a relationship between speaking, listening, interpretation of symbols and reading, expression through symbols and writing, viewing and awareness of the social functions and conventions of communication. Educators' roles will be shown to encompass the use of children's literature, planning of environments, strategies and resources and the assessment of children's progress. The personal experiences of children, including the languages, literature and rhymes and communication styles used in the home will provide the basis for exploring motivating and
meaningful early childhood literacy programs. This course emphasises the use of literacy correctness in all its forms.
