RATIONALE

It is recognized that many postgraduate students need the opportunity to explore or investigate a topic of their own choosing in order to link more closely their professional interests or needs to their course of studies. Project units are designed to provide such an opportunity.

SYNOPSIS

Students will, under the guidance of a member of staff, pursue an in-depth study of a topic relevant to the field of education, and in particular to the focus of the student's major study area. The type of study does not necessarily involve research, but should include a substantial investigatory component leading to the submission of a written research report, material production or essay demonstrating comprehensive and detailed coverage of major concepts, issues, and research/professional literature. All student project proposals will be the subject of a critical review and final topics may be the result of extensive lecturer-student negotiation.

OBJECTIVES

On successful completion of the project the students will have:

1. Demonstrated the ability to plan, conduct and report on an investigation or other such scholarly activity focused on an issue or topic of significance in the field of education.
